Prehistoric Human Impacts On California Birds Evidence From The Emeryville Shellmound Avifauna:

Prehistoric Human Impacts on California Birds Jack M. Broughton, 2004-01-01 *Indianer-Spiele* Ruben Philipp Wickenhäuser, 2014-07-04 Indianer Spiele ist wohl das erste Buch dieser Art in deutscher Sprache Es stellt rund 130 Spiele der Völker des alten Amerika vor von Schleich und Lauerspielen über Geschicklichkeitsspiele bis hin zu Rate Würfeln und Brettspielen Ein Exkurs über Mutproben und brutale Spiele findet sich für den interessierten Leser ebenso wie eine umfangreiche Literaturliste und Fußnoten zu den ethnologischen Quellen des jeweiligen Spiels Die Ausgabe ist eine Neuauflage des 1997 im Verlag an der Ruhr erschienenen Titels Das Buch ist die seriöseste und bestens zu empfehlende Publikation in deutscher Sprache zu diesem Thema BaoBab 12 97 2000 terre des hommes Empfehlungskatalog und **West of the Revolution** Claudio Saunt, 2014-06-09 Claudio Saunt is an advisor for THE AMERICAN REVOLUTION a film by Ken Burns Sarah Botstein and David Schmidt on PBS This panoramic account of 1776 chronicles the other revolutions unfolding that year across North America far beyond the British colonies In this unique history of 1776 Claudio Saunt looks beyond the familiar story of the thirteen colonies to explore the many other revolutions roiling the turbulent American continent In that fateful year the Spanish landed in San Francisco the Russians pushed into Alaska to hunt valuable sea otters and the Sioux discovered the Black Hills Hailed by critics for challenging our conventional view of the birth of America West of the Revolution coaxes our vision away from the Atlantic seaboard and exposes a continent seething with peoples and purposes beyond Minutemen and Redcoats Wall Street Journal **Handbook of Landscape Archaeology** Bruno David, Julian Thomas, 2016-06-03 Over the past three decades landscape has become an umbrella term to describe many different strands of archaeology From the processualist study of settlement patterns to the phenomenologist's experience of the natural world from human impact on past environments to the environment's impact on human thought action and interaction the term has been used In this volume for the first time over 80 archaeologists from three continents attempt a comprehensive definition of the ideas and practices of landscape archaeology covering the theoretical and the practical the research and conservation and encasing the term in a global framework As a basic reference volume for landscape archaeology this volume will be the benchmark for decades to come All royalties on this Handbook are donated to the World Archaeological Congress

Conservation Biology and Applied Zooarchaeology Steve Wolverton, R. Lee Lyman, 2012-12-01 Until now the research of applied zooarchaeologists has not had a significant impact on the work of conservation scientists This book is designed to show how zooarchaeology can productively inform conservation science Conservation Biology and Applied Zooarchaeology offers a set of case studies that use animal remains from archaeological and paleontological sites to provide information that has direct implications for wildlife management and conservation biology It introduces conservation biologists to zooarchaeology a sub field of archaeology and ethnobiology and provides a brief historical account of the development of applied zooarchaeology The case studies which utilize palaeozoological data cover a variety of animals and

environments including the marine ecology of shellfish and fish potential restoration sites for Sandhill Cranes freshwater mussel biogeography and stream ecology conservation of terrestrial mammals such as American black bears and even a consideration of the validity of the Pleistocene rewilding movement The volume closes with an important new essay on the history value and application of applied zooarchaeology by R Lee Lyman which updates his classic 1996 paper that encouraged zooarchaeologists to apply their findings to present day environmental challenges Each case study provides detailed analysis using the approaches of zooarchaeology and concludes with precise implications for conservation biology Essays also address issues of political and social ecology which have frequently been missing from the discussions of conservation scientists As the editors note all conservation actions occur in economic social and political contexts Until now however the management implications of zooarchaeological research have rarely been spelled out so clearly Global Perspectives on Long Term Community Resource Management Ludomir R. Lozny, Thomas H. McGovern, 2019-06-21

Communal level resource management successes and failures comprise complex interactions that involve local regional and increasingly global scale political economic and environmental changes shown to have recurring patterns and trajectories The human past provides examples of long term millennial and century scale successes followed by undesired transitions collapse and rapid failure of collaborative management cooperation on the decadal scale Management of scarce resources and common properties presents a critical challenge for planners attempting to avoid the tragedy of the commons in this century Here anthropologists human ecologists archaeologists and environmental scientists discuss strategies for social well being in the context of diminishing resources and increasing competition The contributors in this volume revisit tragedy of the commons also referred to as drama or comedy of the commons and examine new data and theories to mitigate pressures and devise models for sustainable communal welfare and development They present twelve archaeological historic and ethnographic cases of user managed resources to demonstrate that very basic community level participatory governance can be a successful strategy to manage short term risk and benefits The book connects past present future by presenting geographically and chronologically spaced out examples of communal level governance strategies and overviews of the current cutting edge research The lesson we learn from studying past responses to various ecological stresses is that we must not wait for a disaster to happen to react but must react to mitigate conditions for emerging disasters Holocene Extinctions Samuel T. Turvey, 2009-05-28 The extent to which human activity has influenced species extinctions during the recent prehistoric past remains controversial due to other factors such as climatic fluctuations and a general lack of data However the Holocene the geological interval spanning the last 11 500 years from the end of the last glaciation has witnessed massive levels of extinctions that have continued into the modern historical era but in a context of only relatively minor climatic fluctuations This makes a detailed consideration of these extinctions a useful system for investigating the impacts of human activity over time Holocene Extinctions describes and analyses the range of global extinction events which

have occurred during this key time period as well as their relationship to both earlier and ongoing species losses By integrating information from fields as diverse as zoology ecology palaeontology archaeology and geography and by incorporating data from a broad range of taxonomic groups and ecosystems this novel text provides a fascinating insight into human impacts on global extinction rates both past and present This truly interdisciplinary book is suitable for both graduate students and researchers in these varied fields It will also be of value and use to policy makers and conservation professionals since it provides valuable guidance on how to apply lessons from the past to prevent future biodiversity loss and inform modern conservation planning

The Role of Human Predation in the Structuring of Prehistoric Prey Populations in Northwestern California Adrian Robert Whitaker,2008 *Contributions to San Francisco Bay Prehistory* Alex DeGeorgey,2016 **Current Topics in Avian Disease Research** Rosemary K. Barraclough,2006 **Management of Cowbirds and Their Hosts** Catherine P. Ortega,Jameson Fales Chace,Brian D. Conference,2004 The applications of zooarchaeological research can go far beyond the realms of the lab or the site report These 18 papers are all concerned with the contributions archaeozoologists make to specific problems encountered in the management and conservation of our natural and cultural heritage The volume is divided into two parts Part 1 looks at Zooarchaeology and Wildlife Conservation Issues Contributors explore a range of subjects including how information on past environments can be used to explain the behaviour and distribution of species in the present whether it is feasible to reintroduce game into areas where the species have become locally extinct and how collecting and reporting procedures are related to the interpretation of zooarchaeological data Part 2 covers Archaeozoology and Heritage Management Contributors discuss the position of archaeozoologists in museums universities and private archaeological companies the role of archaeozoologists in assessing and selecting sites for protection or excavation and the problem of the deterioration of zooarchaeological material currently held in collections

Perspectivas actuales en arqueología argentina Ramiro Barberena,Karen Borrazzo,Luis Alberto Borrero,2009 Dead Birds Do Tell Tales Allison Wolfe,2014 The Avifauna of Emeryville Shellmound Hildegarde Howard,1929 *Late Holocene Trends in Prehistoric Waterfowl Exploitation* Shannon Marie Goshen,California State University, Sacramento,2013 Recent studies of faunal assemblages from archaeological sites in the Sacramento Valley California have illustrated substantial anthropogenic impacts to local game populations and distributions during the late Holocene Resource intensification analyses document a decrease in foraging efficiency and suggest populations of profitable mammals and fish were increasingly depressed through the late Holocene Yet limited research on the impacts of harvest pressures on prehistoric bird resources exists for the region Modeling a similar study of avifauna exploitation in the San Francisco Bay I test the hypothesis that profitable avian taxa were depressed by prehistoric hunters in the lower Sacramento Valley through a comprehensive analysis of avifauna remains

from two sites in the lower Sacramento Valley CA SAC 15 H and CA SAC 29 Results are suggestive of resource depression and show avifauna assemblages dominated by waterfowl in which the most profitable taxa geese decline in relative abundance over the time of occupation at both sites A comprehensive analysis of taxonomic composition and taphonomy and a review of regional archaeofaunal records waterfowl life histories and micro regional paleoclimate contexts provide clarification on observed trends in relative abundance and supporting evidence for avian resource depression
