

The agricultural revolution

The invention of agriculture and livestock breeding at the Neolithic (8,000 BC) was one of the key transformations in the history of humanity. For the first time, human beings developed permanent settlement patterns and became productive groups growing their own food. They stopped depending on what their surroundings offered them and started intervening in the production process. Gradually, they created a specialisation in the creation of tools and in division of tasks.

Food in the village

The division of work is a distinguishing feature of Neolithic settlements. Agriculture and stockbreeding required differentiated tasks that were scheduled through the year. Sowing and harvesting were the moments of greatest activity. Parallel to this, villagers added the grain, produced the containers to keep them, created the livestock and processed their meat.

Prehistoric Agriculture In The Central P:

Prehistoric Agriculture in the Central Plains Mary J. Adair, 1988 *Indian Agriculture in America* R. Douglas Hurt, 1987

This is a sweeping survey of American Indian agriculture from its ancient origins to the present. It combines a wealth of historical, anthropological, legal, and economic information in a clear, readable synthesis. This is without doubt the most thorough and comprehensive treatment of American Indian agriculture in print. It is multidisciplinary and impressive both in scope and in depth. Hurt shows a deft hand in summarizing not only the literature on the evolution of agriculture in North America but also the dismal failure of American Indian policy to build on earlier Native American achievements. This book is the starting point for any serious consideration of the literature on subjects ranging from the domestication of corn to pre-contact irrigation to current Indian water rights.

Richard White, author of *It's Your Misfortune and None of My Own*. This extremely worthwhile work is a significant contribution to both Indian history and general American history. Gilbert Fite, past president of the Agricultural History Society and the Western History Association. Merits the attention of all who are concerned about the past, present, and future of American Indians. The chapters devoted to the past century should be required reading for students of modern agricultural and American Indian history.

Peter Iverson, author of *When Indians Became Cowboys*. Native Peoples and Cattle Ranching in the American West. A very thorough and readable account. The scope of this work is truly impressive. The bulk of it revolves around the implementation of United States federal Indian policies aimed at transforming Native Americans into self-sufficient yeoman farmers and farm families during the nineteenth and twentieth centuries. Hurt's chapters on Indian agriculture and water rights in the twentieth century are very timely and instructive. Should become a standard text for American Indian history courses.

New Mexico Historical Review. A useful introduction to the subject that is organized in an admirably clear fashion and can be recommended to student and specialist alike.

Journal of American History. Offers fresh and vital insights into the life and culture of the American Indian.

American Historical Review. A comprehensive, authoritative account of one of the most significant topics in the history of Indian-white relations.

Western Historical Quarterly. *Die Kinder des Prometheus* Hermann Parzinger, 2020-03-03. Die Geschichte des Menschen ist weit älter als die Erfindung der Schrift. Als der erste Frühmensch schpferisch tätig wurde und einen Faustkeil formte, begann er zugleich seine Geschichte zu gestalten. Von diesem Zeitpunkt an nahm er unablässig Einfluss auf kulturhistorische und gesellschaftliche Verhältnisse und prägte die Lebensbedingungen während der nachfolgenden Jahrtausende. Hermann Parzinger führt mit seinem imposanten Werk den Leser durch die Welt unserer Vorfahren. Er beschreibt und erklärt die frühe Menschheitsgeschichte auf allen Kontinenten, von der Menschwerdung in Afrika bis zur Entstehung komplexer ackerbaulicher Gesellschaften an den Ufern von Euphrat und Tigris, von Nil und Gelbem Fluss. Dabei tritt immer wieder eine anthropologische Grundkonstante hervor: Das beständige Streben des Menschen nach Verbesserung seiner Lebensverhältnisse in einer sich wandelnden Umwelt war die Triebfeder seines kulturellen Fortschritts. Dies gilt

bereits für die frühesten Hominiden die zielgerichtet Steingeräte zur Zerteilung von Aas herstellten ein erster Beweis ihres erwachenden Intellekts. Es gilt erst recht für den mit nochmals besserem Planungsvermögen ausgestatteten Homo erectus der den Wandel vom Aasfresser zum Jäger vollzog und dem eine wahrhaft revolutionäre Innovation gelang: die Beherrschung des Feuers. Und es gilt in geradezu dramatischer Weise für den Homo sapiens der den Sprung zu kultureller Modernität vollzog. Nicht nur verbreitete er bis um 13 000 v. Chr. das spezialisierte Wildbeutertum von Afrika aus über die ganze Welt. In seinem Erfindungsgeist bertraf er zudem alle seine Vorfahren auch den Neandertaler der als Erster das Jenseits entdeckte. Der Homo sapiens verhalf schließlich Kunst und Ritual zum Durchbruch, die uns mit wahrhaft monumentaler Wucht erstmals in dem 12 000 Jahre alten Heiligtum am Göbekli Tepe am Rande des Fruchtbaren Halbmonds begegnen. In dieser Weltregion gelingt bald darauf zum ersten Mal in der Menschheitsgeschichte der Schritt zur dauerhaften Sesshaftwerdung, die mit der Domestikation von Wildtieren und Wildgetreide einhergeht. Der Wildbeuter wird zum Bauern, der sich mit seinesgleichen in Dörfern zusammenschließt, die er das ganze Jahr über bewohnt. Vom Anwachsen der Siedlungen und der beginnenden sozialen Differenzierung der Bevölkerung bis zur Entstehung großer urbaner Zentren, deren Organisationsbedarf schließlich auch die Erfindung der Schrift notwendig macht, ist es dann nur noch ein kleiner Schritt. In dem spannenden Buch Hermann Parzingers verbinden sich die zahllosen kleinen Schritte unserer Vorfahren zu der eindrucksvollen Wegstrecke, die der Mensch durch Jahrtausende seiner Entwicklung zurückgelegt hat und mit der verglichen die Zeit der Schriftkultur nur als ein Wimpernschlag der Evolution erscheint.
