**Applied Deep Learning and Computer Vision for Self-Driving Cars** Sumit Ranjan, Dr. S. Senthamilarasu, 2020-08-14  
Explore self driving car technology using deep learning and artificial intelligence techniques and libraries such as TensorFlow Keras and OpenCV  
Key Features  
Build and train powerful neural network models to build an autonomous car  
Implement computer vision deep learning and AI techniques to create automotive algorithms  
Overcome the challenges faced while automating different aspects of driving using modern Python libraries and architectures  
Book Description  
Thanks to a number of recent breakthroughs self driving car technology is now an emerging subject in the field of artificial intelligence and has shifted data scientists focus to building autonomous cars that will transform the automotive industry  
This book is a comprehensive guide to use deep learning and computer vision techniques to develop autonomous cars  
Starting with the basics of self driving cars SDCs this book will take you through the deep neural network techniques required to get up and running with building your autonomous vehicle  
Once you are comfortable with the basics you ll delve into advanced computer vision techniques and learn how to use deep learning methods to perform a variety of computer vision tasks such as finding lane lines improving image classification and so on  
You will explore the basic structure and working of a semantic segmentation model and get to grips with detecting cars using semantic segmentation  
The book also covers advanced applications such as behavior cloning and vehicle detection using OpenCV transfer learning and deep learning methodologies to train SDCs to mimic human driving  
By the end of this book you ll have learned how to implement a variety of neural networks to develop your own autonomous vehicle using modern Python libraries  
What you will learn  
Implement deep neural network from scratch using the Keras library  
Understand the importance of deep learning in self driving cars  
Get to grips with feature extraction techniques in image processing using the OpenCV library  
Design a software pipeline that detects lane lines in videos  
Implement a convolutional neural network CNN image classifier for traffic signal signs  
Train and test neural networks for behavioral cloning by driving a car in a virtual simulator  
Discover various state of the art semantic segmentation and object detection architectures  
Who this book is for  
If you are a deep learning engineer AI researcher or anyone looking to implement deep learning and computer vision techniques to build self driving blueprint solutions this book is for you  
Anyone who wants to learn how various automotive related algorithms are built will also find this book useful  
Python programming experience along with a basic understanding of deep learning is necessary to get the most of this book
