Pioneer Of The Chinese Revolution Zhang Binglin And Confucianism:

Pioneer of the Chinese Revolution ,1990-07 Shimada Kenji is one of Japan's greatest sinologists with formidable scholarly accomplishments in many fields classical Chinese thought Neo Confucianism in China and Japan late Qing thought the 1911 Revolution and Sino Japanese relations This book consists of two long essays touching on one of Shimada's abiding themes the influence of domestic Chinese systems of thought on the development of Chinese revolutionary thought This massive project engages Shimada's greatest strength a profound awareness of and deep study in the history of Chinese philosophy and religion when examining the people and ideas that culminated in the 1911 Revolution and the end of the imperial institution in China Unlike most other scholars Shimada takes his modern protagonists with complete seriousness when they draw on seemingly traditional ideas to justify radical change in the late nineteenth and early twentieth centuries Zhang Binglin the subject of the first essay in this book is arguably the most misunderstood figure among the key revolutionaries of the 1911 period The appearance of this classic essay Zhang Binglin Traditional Chinese Scholar and Revolutionary 1970 marked the first time that Zhang had been assessed as a whole person Shimada explains how Zhang himself saw the inextricable linkage between a wholehearted devotion to traditional Chinese scholarship indeed the very preservation of that tradition and the revolutionary cause Often dismissed as a crackpot brilliant or otherwise or as a perverse intransigent incapable of comprehending the modern world as it passed him by Zhang has never received the kind of attention in the West that his importance warrants The second essay Confucius in the Era of the 1911 Revolution 1978 deals with an issue that has never before received concerted attention How could the figure of Confucius have been deified by the leaders of the 1898 Reform Movement and less than two decades later be excoriated by the leaders of the May Fourth Movement Shimada analyzes the views concerning Confucianism of all the major groups including the Qing government and over seas Chinese in Europe in the period under study 1895 1919 before suggesting some answers to this fascinating question

The Discovery of Chinese Logic Joachim Kurtz, 2011-07-27 Until 1898 Chinese and foreign scholars agreed that China had never known needed or desired a field of study similar in scope and purpose to European logic Less than a decade later Chinese literati claimed that the discipline had been part of the empire s learned heritage for more than two millennia This book analyzes the conceptual ideological and institutional transformations that made this drastic change of opinion possible and acceptable Reconstructing the discovery of Chinese logic as a paradigmatic case of the epistemic shifts that continue to shape interpretations of China s intellectual history it offers a fresh view of the formation of modern academic discourses in East Asia and adds a neglected chapter to the global histories of science and philosophy

Rethinking Confucianism Benjamin A. Elman, John B. Duncan, Herman Ooms, 2002 **A Brief History of the Relationship Between Confucianism, Daoism, and Buddhism** Zhongjian Mou, 2023-01-01 Chinese traditions of Confucianism Daoism and Buddhism have a profoundly philosophical dimension The three traditions are frequently referred to as three paths of moral teachings In this book Mou provides a clear account of the textual corpus that emerges to define each of these traditions and how this canonical axis was augmented by a continuing commentarial tradition as each generation reauthorized the written core for their own time and place In his careful exegesis Mou lays out the differences

between the more religious reading of these traditions with their defining practices that punctuate the human journey through life and the more intellectual and philosophical treatment of the texts that has and continues to produce a first order culture of annotation that become integral to the traditions themselves At the center of the alternative religious experience reflected throughout the teachings of Confucianism Daoism and Buddhism is the project of personal cultivation as it comes to be expressed as robust growth in family and communal relations For Mou these three highly distinctive and yet complementary ways of thinking and living constitute a kind of moral ecology wherein each of them complements the others as they stand in service to a different dimension of the human need for an educated spirituality 田海平,1991 **The**

Chinese medicine in Los Angeles New York Oxford Mallorca and Berlin The history of the Menghe current is relevant to anyone interested in the development of Chinese medicine in late imperial and modern China This book traces Chinese medical history along the currents created by generations of physicians linked to each other by a shared heritage of learning by descent and kinship by sentiments of native place as well as nationalist fervor by personal rivalries and economic competition by the struggle for the survival of tradition and glorious visions of a new global medicine On the level of both theory and practice this history marks a departure from the focus on texts and ideas that has dominated Western engagement with Chinese medicine to date Its goal is to locate medicine within the concrete lives of physicians and their patients restoring an agency to their actions that easily gets lost in our search for the forces or structures that shape historical process To this end the author interweaves social history and medical case studies ethnography and biography to narrate a story of Chinese medicine that is very different from any that has been told before
