PLACE OF MAGIC IN THE INTELLECTUAL HISTORY OF EUROPE LYNN. THORNDIKE, 2018 **The Place of Magic in the Intellectual History of Europe** L. Thorndike, 1903 The Place of Magic in the Intellectual History of Europe Lynn Thorndike, 1967 Lynn Thorndike of Columbia University in his critical essay on *The Place of Magic in the Intellectual History of Europe* 1905 finds in Plato suggestions that he believed in astrology in the potent influence of the stars over all changes in earthly matter Aristotle's doctrine says Thorndike was similar and he sees in it some preparation for mediaeval astrology and demonology as also in the philosopher's attribution of souls to plants and animals a theory which would readily lend itself to an assumption of magic properties in herbs and beasts From such considerations the inference is drawn that Greek science at its best was not untainted with magic In Rome Thorndike tells us even Cicero's condemnation of astrology is somewhat neutralized by the fact that in his *Dream of Scipio* he apparently attributes to planets influence over man According to Thorndike men in the Roman Empire condemned magic but understood the word in a restricted and bad sense Pliny who pretended to be free from all belief in it is made to appear actually addicted to it at least in the sense that he accepted much of its traditions beliefs and practices as also did Seneca and later men of eminence in the imperial world as well as Cato and others of an earlier day *The Standard History of the World Vol 9 The Place of Magic in the Intellectual History of Europe* Lynn Thorndike, 2015-06-12 Excerpt from *The Place of Magic in the Intellectual History of Europe* Even a slight acquaintance with European history reveals the existence of a number of curious and apparently unreasonable beliefs prevalent throughout a period extending from early medi val to comparatively recent times There is the belief in witchcraft for instance From the canons of synods in the early Middle Ages down to the pitiless executions during the witchcraft delusion there is abundant evidence of its prominence It played its part not only in humble life but in court intrigues and in the accusations brought at state trials The belief that one's future could be learned by observing the stars was equally widespread Astrologers thrived at the courts of kings and sometimes their advice was taken even by him whose every act was held to be under special divine direction It would be a great mistake to think that the astrologer was maintained merely for the amusement of king and court like the jester His utterances were taken most seriously and the principles of his art were so generally accepted as to become the commonplaces of the thought and the conversation of daily life In 1305 for instance when certain cardinals urged Pope Clement V to return to Rome they reminded him that every planet was most powerful in its own house About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve
