## Plain Yarns From The Fleet:

*Naval Leadership and Management, 1650-1950* Richard Harding, Helen Doe, 2012 Many works on naval history ascribe success to the special qualities of individual leaders Nelson being the prime example This book in contrast moves away from focusing on Nelson and other leading individuals to explore more fully how naval leadership worked in the context of a large complex globally capable institution It puts forward important original scholarship around four main themes the place of the hero in naval leadership organisational friction in matters of command the role of management capability in the exercise of naval power and the evolution of management and technical training in the Royal Navy Besides providing much new interesting material for naval and maritime historians the book also offers important insights for management and leadership specialists more generally Back cover

The British Hawkins Class Cruisers Aidan Dodson, 2025-02-04 During the First World War rumors of heavily armed German raiders led to the building of the first modern heavy cruisers by the Royal Navy Named for famous Elizabethan seamen they were very different from the lumbering armored cruisers of the previous generation and were enlarged developments of the highly successful light cruisers that had been built since the mid 1910s As such they provided the prototypes for the Washington Treaty cruisers that dominated naval construction during the 1920s with two of them also pioneering the use of the catapult for launching aircraft from cruisers Completed too late to actively participate in the First World War they would go on to have mixed fortunes spending much of their careers as flagships but also being sadly attracted to rocky reefs in two cases with fatal results One Cavendish later Vindictive fulfilled a remarkable array of functions during her career laid down as a cruiser completing as an aircraft carrier then reverting to a cruiser to be further transformed into a dedicated cadet training ship and finally a repair ship Meanwhile Effingham underwent the most comprehensive rebuilding of any British cruiser of her era Disarmed and nearly scrapped as a result of the London Naval Treaty all the survivors nevertheless returned to serve during the Second World War in a range of roles two gaining battle honors albeit in one case fatally during the Norwegian campaign and Hawkins and Frobisher spending long years as deep sea escorts in the South Atlantic and Indian Oceans before being brought back to bombard the beaches of Normandy The story of the Hawkins class therefore weaves strands that include the technical development of the cruiser in the UK and abroad the early use of aircraft at sea international naval diplomacy and treaty making between the wars the evolution of the cadet training regime in the Royal Navy the way in which the vital southern and eastern trade routes were kept open and the contribution of naval forces to the success of the invasion of Europe With its detailed descriptions and analysis of the ships and their development and the narratives of their careers all tied together with a wide ranging collection of photographs and line drawings this new history of a distinguished Royal Navy cruiser class will delight naval historians and enthusiasts ship modelers and all those who care to read about the exploits of the imperial navy in peace and war

**Jutland** Nicholas Jellicoe, 2016-03-30 A compelling dramatic account of the Royal Navy's last great sea battle Robert K Massie Pulitzer Prize

winning and New York Times bestselling author of *Dreadnought* More than a century later historians still argue about this controversial and misunderstood World War I naval battle off the coast of Denmark It was the twentieth century's first engagement of dreadnoughts and while it left Britain in control of the North Sea both sides claimed victory and decades of disputes followed revolving around senior commanders Admiral Sir John Jellicoe and Vice Admiral Sir David Beatty This book not only retells the story of the battle from both a British and German perspective based on the latest research but also helps clarify the context of Germany's inevitable naval clash and the aftermath after the smoke had cleared

*The Challenges of Command* Robert L. Davison, 2016-04-01 In the period leading up to the First World War Britain's naval supremacy was challenged by an arms race with Germany fuelled not only by military and geo strategic rivalries but an onrush of technological developments As this book demonstrates steam turbines bigger guns mechanical computing devices and ever increasing tonnage meant that the Royal Navy was forced to confront many long cherished beliefs and sensitive social and political issues By looking at key continuities over the period of 1880-1919 the study explores how the service and its officers attempted to deal with fundamental changes in professional requirements and how cultural and social values underwent a transformation in the run up to the First World War In particular the book looks at how the executive officer corps was presented with a revolution in naval affairs As the Navy was transformed into an industrialized workplace officers were challenged by an alteration in the culture of command as arrangements carried over from the days of sail began to breakdown under the practical requirements of a steam and steel fleet The book charts the ebb and flow of the debate and the various ideas put forward to deal with the structural challenges faced by the Royal Navy The writings of reformers and commentators such as Fisher Beresford Corbett Laughton and Mahan provide the background to the specific problems faced and are analysed both in relation to the nature of the reforms implemented and more crucially the performance of the Senior Service during the First World War

*The Battlecruiser HMS HOOD* Bruce Taylor, 2008-04-30 The battlecruiser HMS Hood is one of the great warships of history Unmatched for beauty unequalled for size for twenty years the Hood was the glory ship of the Royal Navy flying the flag across the world in the twilight years of the British Empire Here in words photos and colour illustrations is the story of her life her work and her people from keel laying on the Clyde in 1916 to destruction at the hands of the Bismarck in 1941 Among the eye-catching strengths of the book is a unique gallery of photos including stills from a recently discovered piece of colour footage of the ship plus a spectacular set of computer generated images of both the exterior and interior by the world's leading exponent of the art a man who worked with the film director James Cameron of Titanic fame A wealth of new information on Hood's structure and operation make it essential reading for the enthusiast modeller and historian alike Hugely successful from its first publication this is the third printing of the ultimate book on the ultimate ship of the pre war era
