College Rankings Latest Promo:

Digital Tools for Academic Branding and Self-Promotion Cabrera, Marga, Lloret, Nuria, 2016-10-31 Reputation can be a pivotal factor to potential success throughout one's academic career. By utilizing available technological assets and tools, professionals can effectively manage their personal brands. Digital Tools for Academic Branding and Self-Promotion is an authoritative reference source for the latest research on the interrelationship between digital branding and academic reputation. Showcasing relevant digital platforms and techniques, this book is a compendium of vital material for academics, professionals, practitioners, and marketers interested in effective reputation management. **Rank Hypocrisies** Derek Sayer, 2014-12-03 In crystalline text steeped in cold rage, Sayer takes aim at the REF's central claim that it is a legitimate process of expert peer review. He critiques university and national level REF processes against actual practices of scholarly review as found in academic journals, university presses, and North American tenure procedures. His analysis is damning. If the REF fails as scholarly review, how can academics and universities continue to participate? And how can government use its rankings as a basis for public policy? Tarak Barkawi, London School of Economics. Sayer makes a compelling argument that the Research Excellence Framework is not only expensive and divisive but is also deeply flawed as an evaluation exercise. **Rank Hypocrisies** is a rigorous and scholarly evaluation of the REF yet written in a lively and engaging style that makes it highly readable. Dorothy Bishop, University of Oxford. Few decisions are as consequential for the funding and reputation of Britain's universities as those of REF panels. Not only do REF rankings determine the levels of research funding universities receive from the state, they equally affect institutions' ability to attract external grants, top flight faculty, and graduate students. Whatever benefit the UK's periodic research assessment exercises may have brought to research productivity, the REF has been widely criticized for its enormous costs in taxpayers' money and academics' time, its discouragement of innovative and especially interdisciplinary research, and its negative effects on collegiality and staff morale. Derek Sayer extends these arguments notably through his discussion of the questionable staff selection processes used in REF2014 within his own university. Where **Rank Hypocrisies** goes beyond previous critiques is in its open challenge to the REF's claim to provide expert review of the outputs, the very heart of its legitimacy. Examining the composition and operation of REF disciplinary subpanels in forensic detail, Sayer paints a picture in which overburdened assessors assign vaguely defined grades in fields that are frequently not their own while ignoring all external indicators of the academic influence of the publications they are appraising and then shred all records of their deliberations. Judged against international norms of peer review, the REF is an elaborate charade and an insult to the core values of the academy. **Recommended Promotions to the Ranks of Professor and Associate Professor** University of Michigan. Office of the Provost and Vice President for Academic Affairs, 2005 **Global University Rankings and the Politics of Knowledge** Michelle Stack, 2021-06-17 For many institutions, to ignore your university's ranking is to become invisible, a risky proposition in a competitive search for funding.

But rankings tell us little if anything about the education scholarship or engagement with communities offered by a university

Drawing on a range of research and inquiry based methods *Global University Rankings and the Politics of Knowledge* exposes how universities became servants to the education industry and its impact Conceptually unique in its scope *Global University Rankings and the Politics of Knowledge* addresses the lack of empirical research behind university and journal ranking systems Chapters from internationally recognized scholars in decolonial studies provide readers with robust frameworks to understand the intersections of coloniality and Indigeneity and how they play out in higher education Contributions from diverse geographical and disciplinary contexts explore the political economy of rankings within the contexts of the Global North and South and examine alternatives to media driven rankings This book allows readers to consider the intersections of power and knowledge within the wider contexts of politics culture and the economy to explore how assumptions about gender social class sexuality and race underpin the meanings attached to rankings and to imagine a future that confronts and challenges cognitive environmental and social injustice

Violence Prevention and Safety Promotion in Higher Education Settings Badea, Mihaela, Suditu, Mihaela, 2017-08-10 Nonviolent environments are desirable in many areas of life yet none are as essential as within our educational institutions Providing a safe space for students has become a critical concern in modern society *Violence Prevention and Safety Promotion in Higher Education Settings* is a vital resource that examines the current sources of violence within educational systems and it offers solutions on how to provide a safer space for both students and educators alike Highlighting pertinent areas of interest including technological violence academic regulations nonviolent communication and gender discrimination this reference publication is ideal for academicians future educators students and researchers interested in recent advancements that aid in providing secure safe educational environments for everyone
