Build, Run, and Sell Your Apple

Consulting Practice Charles Edge, 2018-08-09 Starting an app development company is one of the most rewarding things you'll ever do. Or it sends you into bankruptcy and despair. If only there was a guide out there to help you along the way. This book is your guide to starting, running, expanding, buying, and selling a development consulting firm. But not just any consulting firm, one with a focus on Apple. Apple has been gaining adoption in businesses ranging from traditional 5 person start-ups to some of the largest companies in the world. Author Charles Edge has been there since the days that the Mac was a dying breed in business, then saw the advent of the iPhone and iPad and has consulted for environments ranging from the home user to the largest Apple deployments in the world. Now there are well over 10,000 shops out there consulting on Apple in business and more appearing every day. **Build, Run, and Sell Your Apple Consulting Practice** takes you through the journey from just an idea to start a company all the way through mergers and finally into selling your successful and growing Apple development business. What You'll Learn: Create and deploy grassroots as well as more traditional marketing plans. Engage in the community of developers and companies that will hire you and vice versa. Effectively buy and sell your time and talents to grow your business while remaining agile. Who This Book Is For: Business owners looking to grow and diversify their companies as well as developers, engineers, and designers working on Apple apps who would like to branch out into starting their own consulting business.

The Art of the Sale Philip Delves Broughton, 2012-04-12 A revelatory examination of the alchemy of successful selling and its essential role in just about every aspect of human experience. When Philip Delves Broughton went to Harvard Business School, an experience he wrote about in his New York Times bestseller *Ahead of the Curve*, he was baffled to find that sales was not on the curriculum. Why not? he wondered. Sales plays a part in everything we do, not just in clinching a deal but in convincing people of an argument, getting a job, attracting a mate, or getting a child to eat his broccoli. Well, he thought, he'd just have to assemble his own master class in the art of selling. And so he did, setting out on a remarkable pilgrimage to find the world's great wizards of sales. Great selling is an art that demands creativity, mindfulness, selflessness, and resilience, but anyone who says you can become a great salesperson in 15 minutes is either a charlatan or a fool. The more Delves Broughton traveled and listened, the more he found a wealth of applicable insight. In Morocco, he found the master rug merchant who thrives in Kasbah by using age-old principles to read his customers. In Tampa, he met with Tony Sullivan, king of the infomercial, and learned the importance of creating a good narrative to selling effectively. In a sold-out seminar with sales guru Jeffrey Gitomer, he uncovered the ways successful selling approaches religion, inspiring faith and even a sense of duty in customers. From celebrity art dealer Larry Gagosian to the most successful saleswoman in Japan, Broughton tracked down anyone who would help him understand what it took to achieve greatness in sales. Though sales is the engine of commerce and industry, more Americans work in sales than in manufacturing, marketing, or finance; it remains

shrouded in myth The Art of the Sale is a powerful beam of light onto the field a wise and winning tour of the best in show of this endeavor which is nothing less than the means by which all of us one way or another get our way in the world
