Writing in Motion Kenneth King, 2012-01-01 Kenneth King is one of America's most inventive postmodern choreographers His dancing has always reflected his interest in language and technology combining movement with film machines lighting and words both spoken and written King is also conversant in philosophy and some of his most influential dances have been dedicated to and in dialogue with the work of such philosophers as Susanne K Langer Edmund Husserl and Friedrich Nietzsche Since the 1960s he has performed his dance to texts both spoken and prerecorded texts intended to stand separately as literary works Writing in Motion spans more than thirty years and is collected here for the first time It includes essays performance scripts of King's own work art criticism philosophy and cultural commentary Dense with movement these writings explode and reconfigure the familiar crack syntax open and invent startling new words Dancing to King is writing in space and writing is a dance of ideas Whether referencing Aristotle Langer Simone de Beauvoir MTV Maurice Blanchot or Marshall McLuhan King's delightfully lavish prose is very much in motion [The Rebus and the Parrot](#), [The End Game](#) CR Searle, 2020-10 Having reached Eden in 4930 in search of the last pieces of the Rebus of Akhenaten and the treasure it promises a world populated by robots controlled by Montard Billy discovers space time and reality are an illusion of pulsating light and dark we perceive not outside but inside in our consciousness of our unconsciousness But amazingly learns our unconsciousness is the quantum unconsciousness of all things solids liquids and gases the source of all that is real to us And the future once the home of Nanochromes is a virtual reality game controlled by the Toba Men A game

he must escape if he is to reveal the secret of the Rebus and prevent the mass extinction event of 2084 But not without hazarding the most perilous dangers imaginable and suffering the death of a friend that will change his life

Grassfinches in Australia Mark Shephard OAM,Anthony Pridham,Joseph M Forshaw,2012-08-09 It is not surprising that Australian grassfinches are highly popular with ornithologists and aviculturists for included among the species are one of the most beautiful of all birds the Gouldian Finch *Erythrura gouldiae* and one of the most familiar cagebirds the Zebra Finch *Taeniopygia guttata* Despite a scarcity in published works on finches interest in the species is growing leading to a dramatic advancement in our knowledge of many species For example we have gained new information from field observations carried out on little known species including the Blue faced Parrot Finch *Erythrura trichroa* and the Red eared Firetail *Stagonopleura oculata* Significant advances in taxonomic research largely as a consequence of the development and refinement of biochemical analyses often involving DNA DNA hybridisation have given us a new insight into relationships among species with some unexpected alliances being determined Additionally dramatic changes have taken place in avicultural practices and in virtually all countries aviculture has taken on a new professional approach with the most notable results being increased productivity and success with a wider variety of species After a lapse of almost half a century since publication of Klaus Immelmann s eminent work on finches based on extensive field studies the time has come for a new examination of Australian grassfinches In *Grassfinches in Australia* Joseph Forshaw Mark Shephard and Anthony Pridham have summarised our present knowledge of each species and have given readers a visual appreciation of the birds in their natural habitats and in aviculture The resulting combination of superb artwork and scientifically accurate text ensures that this volume will become the standard reference work on Australian grassfinches In addition to enabling aviculturists to know more about these finches in the wild as a guide to their own husbandry techniques detailed information on current management practices for all species in captivity is provided The book also includes colour plates depicting some of the more common mutations held in Australian and overseas collections
