Place Vendôme Architecture And Social Mobility In Eighteenth Century Paris:

The Place Vendôme Rochelle Ziskin, 1999-01-28 In this book the author explores the sociological foundations of domestic design in eighteenth century France the acknowledged leader of domestic architecture in this period Focusing on the Place Vendôme which was developed by the financiers of Paris she examines the representational strategies and dilemmas of French elites which were crucial to the formation of a French mode of design Through analyses of social distinctions and ambitions Ziskin explores the manner in which the dwellings of the Place Vendôme embodied beliefs about the nature of society and the appropriate relations among social groups

Architectural Space in Eighteenth-Century Europe Meredith Martin, 2017-07-05 Architectural Space in Eighteenth Century Europe Constructing Identities and Interiors explores how a diverse pan European group of eighteenth century patrons among them bankers bishops bluestockings and courtesans used architectural space and décor to shape and express identity Eighteenth century European architects understood the client's instrumental role in giving form and meaning to architectural space In a treatise published in 1745 the French architect Germain Boffrand determined that a visitor could judge the character of the master for whom the house was built by the way in which it is planned decorated and distributed This interdisciplinary volume addresses two key interests of contemporary historians working in a range of disciplines one the broad question of identity formation most notably as it relates to ideas of gender class and ethnicity and two the role played by different spatial environments in the production not merely the reflection of identity at defining historical and cultural moments By combining contemporary critical analysis with a historically specific approach the book's contributors situate ideas of space and the self within the visual and material remains of interiors in eighteenth century Europe In doing so they offer compelling new insight not only into this historical period but also into our own

Architecture, Print Culture and the Public Sphere in Eighteenth-Century France Richard Wittman, 2007 This book focuses on the complex ways in which architectural practice theory patronage and experience became modern with the rise of a mass public and a reconfigured public sphere between the end of the seventeenth century and the French Revolution Presenting a fresh theoretical orientation and a large body of new primary research this book offers a new cultural history of virtually all the major monuments of eighteenth century Parisian architecture with detailed analyses of the public debates that erupted around such Parisian monuments as the east facade of the Louvre the Place Louis XV the Place de la Concorde and the church of Sainte Genevieve the Pantheon Depicting the passage of architecture into a mediatized public culture as a turning point and interrogating it as a symptom of the distinctly modern configuration of individual society and space that emerged during this period this study will interest readers well beyond the discipline of architectural history

François Blondel Anthony Gerbino, 2012-12-06 First director of the Académie royale d'architecture François Blondel established a lasting model for architectural education that helped transform a still largely medieval profession into the one we recognize today Most well known for his 1676 urban plan of

Paris Blondel is also celebrated as a mathematician scientist and scholar Few figures are more representative of the close affinity between architecture and the new science of the seventeenth century The first full length study in English to appear on this polymath this book adds to the scholarship on early modern architectural history and particularly on French classicism under Louis XIV and his minister Jean Baptiste Colbert It studies early modern science and technology Baroque court culture and the development of the discipline of architecture

Luxury Peter McNeil, Giorgio Riello, 2016-05-19 We live in a world obsessed by luxury Long distance airlines compete to offer first class sleeping experiences and hotels recommend exclusive suites where you are never disturbed Luxury is a rapidly changing global industry that makes the headlines daily in our newspapers and on the internet More than ever luxury is a pervasive presence in the cultural and economic life of the West and increasingly too in the emerging super economies of Asia and Latin America Yet luxury is hardly a new phenomenon Today s obsession with luxury brands and services is just one of the many manifestations that luxury has assumed In the middle ages and the Renaissance for example luxury was linked to notions of magnificence and courtly splendour In the eighteenth century luxury was at the centre of philosophical debates over its role in shaping people s desires and oiling the wheels of commerce And it continues to morph today with the growth of the global super rich and increasing wealth polarization From palaces to penthouses from couture fashion to lavish jewellery from handbags to red wine from fast cars to easy money Peter McNeil and Giorgio Riello present the first ever global history of luxury from the Romans to the twenty first century a sparkling and ever changing story of extravagance excess novelty and indulgence
