The Lean PhD Julian Kirchherr, 2018-05-18 This book fundamentally challenges the way in which

PhDs are currently pursued It applies lean methodologies which have been embraced by start ups to the doctoral research process It explains how to apply techniques such as the minimal viable product MVP approach rapid prototyping and pivoting to each stage from choosing a topic to seeking feedback in order to save time make the process more efficient and demonstrate impact Chapters are enriched with insights from PhD researchers practical guidance on going lean and a wealth of empirical data which supports this new approach to postgraduate research This inspiring text is a must read for prospective and current PhD students who wish to accelerate their careers in academia and beyond *Reinventing Capitalism in the Age of Big Data* Viktor Mayer-Schonberger, Thomas H. Davenport, 2018-02-22 Markets have long been acknowledged to be a superior mechanism for managing resources but until the advent of big data they largely functioned better in theory than in practice Now as ideal markets are within reach because of vastly greater access to information we are on the verge of a major disruption As data becomes a more valuable asset than cash the rules for surviving and thriving are changing Reinventing Capitalism is a provocative look at how data is reinventing markets and in so doing is ushering in an era where the firm is no longer predominant With richer and more comprehensive information about human wants and needs an economy powered by data offers the possibility of increased abundance equality and resilience The data driven markets that will thrive in this environment are far better than firms at organizing human endeavors meaning that finance driven capitalism is being displaced by its more efficient more sustainable and more democratic disruptor data capitalism
