Hensler,Bonnie Dombey-Moore,Elizabeth

Giddens, Jennifer Gross, Erik Moller, 2000-08-02 Class action lawsuits allowing one or a few plaintiffs to represent many who seek redress have long been controversial. The current controversy centered on lawsuits for money damages is characterized by sharp disagreement among stakeholders about the kinds of suits being filed, whether plaintiffs' claims are meritorious and whether resolutions to class actions are fair or socially desirable. Ultimately these concerns lead many to wonder: Are class actions worth their costs to society and to business? Do they do more harm than good? To describe the landscape of current damage class action litigation, elucidate problems and identify solutions, the RAND Institute for Civil Justice conducted a study using qualitative and quantitative research methods. The researchers concluded that the controversy over damage class actions has proven intractable because it implicates deeply held but sharply contested ideological views among stakeholders. Nevertheless, many of the political antagonists agree that class action practices merit improvement. The authors argue that both practices and outcomes could be substantially improved if more judges would supervise class action litigation more actively and scrutinize proposed settlements and fee awards more carefully. Educating and empowering judges to take more responsibility for case outcomes and ensuring that they have the resources to do so can help the civil justice system achieve a better balance between the public goals of class actions and the private interests that drive them. Guidebook for Evaluating Airport Parking Strategies and Supporting Technologies, 2009 This guidebook presents various parking strategies and technologies that are employed or have potential applications at airports in the United States. This guidebook will assist airport operators in: 1. determining their specific goals as they relate to public parking and their customer needs; 2. gaining an understanding of the parking strategies and technologies that correspond to their goals; and 3. evaluating benefits, costs, and implementation. With parking as the primary source of non-airline revenue at airports and usually the customer's first and last experience with the airport, it is an important focus in an airport's overall strategic plan. ACRP Report 24 provides in a single source a buffet of parking strategies and technologies to complement and achieve airport operators' long-term goals and objectives. This guidebook will be useful to airport parking owners and operators and their consultants as they strive to better accommodate the needs of their customers, improve customer service, increase operational efficiency, and enhance net revenues.
