Prime Big Deals Facebook Review:

Dynamics of Big Internet Industry Groups and Future Trends Miguel Gómez-Uranga, Jon Mikel

Zabala-Iturriagagoitia, Jon Barrutia, 2016-03-31 This book applies a new analytical framework to the study of the evolution of large Internet companies such as Apple Google Microsoft Facebook Amazon and Samsung It sheds light on the dynamics of business groups which are approached as business ecosystems and introduces the concept of Epigenetic Economic Dynamics EED which is defined as the study of the epigenetic dynamics generated as a result of the adaptation of organizations to major changes in their respective environments The book augments the existing literature on evolutionary economic thinking with findings from epigenetics which are proving increasingly useful in analyzing the workings of large organizations It also details the theoretical and conceptual nature of recent work based on evolutionary economics mainly from the perspective of generalized Darwinism resilience and related variety and complements the work conducted on evolutionary economics by applying the analytical framework of EED It makes it easier to forecast future dynamics on the Internet by proving that a sizable number of big business groups are veering from their initial paths to take unprecedented new directions as a result of competition pressure and as such is a valuable resource for postgraduates and researchers as well as those involved in economics and innovation studies

Committee, 2013-09-26 This report warns that the extraordinary success of the UK's creative industries may be jeopardised

by any dilution of intellectual property rights and the failure to tackle online piracy The Committee also strongly condemns the failure of Google in particular to tackle access of copyright infringing websites through its search engine Such illegal piracy combined with proposals arising from the Hargreaves review to introduce copyright exceptions and a failure to strengthen copyright enforcement as envisaged by the Digital Economy Act 2010 together threaten the livelihoods of the individuals and industries that contribute over 36 billion annually to the UK economy Also the Olympics No Marketing Rights scheme is excessively restrictive and is preventing British creative companies from realising the benefits they deserve from the Olympic legacy The Committee calls for a central champion of Intellectual Property in Government to promote and protect the interests of UK intellectual property the maximum penalty for serious online IP theft to be increased to 10 years imprisonment in line with the punishment for such offences in the physical world more evidence and scrutiny before any exceptions to copyright such as those suggested by Hargreaves are applied redoubled efforts to ensure that the video games tax credit is approved by the European Commission and introduced as soon as possible reforms to the income tax and tax reliefs systems to recognise adequately the freelance nature of much creative work greater recognition of the importance of arts subjects in the curriculum *Leading and Managing in the Digital Era* Gregory Prastacos, Nancy Pouloudi, 2024-12-30
