The Aesthetics of Scientific Experiments Milena Ivanova, Alice Murphy, 2023-06-16 The relationship between aesthetics and science has begun to generate substantial interest However for the most part the focus has been on the beauty of theories and other aspects of scientific practice have been neglected This book offers a novel perspective on aesthetics in experimentation via ten original essays from an interdisciplinary group comprised of philosophers historians of science and art and artists The collection provides an analysis of the concept of beauty in the evaluation of experiments What properties do practising experimenters value How have the aesthetic properties of scientific experiments changed over the years Secondly the volume looks at the role that aesthetic factors including negative values such as ugliness as well as experiences of the sublime and the profound play in the construction of an experiment and its reception Thirdly the chapters provide in depth historical case studies from the Royal Society which also allows for a study of the depiction of scientific experiment in artworks as well as contemporary examples from the Large Hadron Collider and cases of experiments designed by artificial intelligence Finally it offers an exploration of the commonalities between how we learn from experiments on the one hand and the cognitive value of artworks on the other The Aesthetics of Scientific Experiments will be of interest to researchers and advanced students working in philosophy and history of science philosophy and history of art as well as practising scientists and science communicators

Experiment and Exploration: Forms of World-Disclosure Sönke Ahrens, 2014-03-18 This book deals with contemporary epistemological questions connecting Educational Philosophy with the field of Science and Technology Studies It can be understood as a draft of a general theory of world disclosure which is in its core a distinction between two forms of world disclosure experiment and exploration These two forms have never been clearly distinguished before The focus lies on the experimental form of world disclosure which is described in detail and in contrast to the explorational form along the line of twenty one characteristics which are mainly derived from empirical studies of experimental work in the field of natural

sciences It can also be understood as an attempt to integrate elements of the Anglo Saxon Philosophy of Science with elements of the German tradition of Educational Philosophy This is also reflected in the style of writing In accordance to the content level of the book the argument for experimental forms of world disclosure is written in an essayistic readable style which can be understood as an experimental form of writing This book is a translation of the doctoral thesis Experiment und Exploration Bildung als experimentelle Form der Welterschließung summa cum laude The thesis was published in German in 2010 by Transcript Bielefeld in the series called Theorie Bilden edited by Prof Dr Hannelore Faulstich Wieland Prof Dr Hans Christoph Koller Prof Dr Karl Josef Pazzini and Prof Dr Michael Wimmer UNESCO science report UNESCO,2015-11-09 There are fewer grounds today than in the past to deplore a North South divide in research and innovation This is one of the key findings of the UNESCO Science Report towards 2030 A large number of countries are now incorporating science technology and innovation in their national development agenda in order to make their economies less reliant on raw materials and more rooted in knowledge Most research and development R D is taking place in high income countries but innovation of some kind is now occurring across the full spectrum of income levels according to the first survey of manufacturing companies in 65 countries conducted by the UNESCO Institute for Statistics and summarized in this report For many lower income countries sustainable development has become an integral part of their national development plans for the next 10 20 years Among higher income countries a firm commitment to sustainable development is often coupled with the desire to maintain competitiveness in global markets that are increasingly leaning towards green technologies The quest for clean energy and greater energy efficiency now figures among the research priorities of numerous countries Written by more than 50 experts who are each covering the country or region from which they hail the UNESCO Science Report towards 2030 provides more country level information than ever before The trends and developments in science technology and innovation policy and governance between 2009 and mid 2015 described here provide essential baseline information on the concerns and priorities of countries that could orient the implementation and drive the assessment of the 2030 Agenda for Sustainable Development in the years to come **Recent Advancement in Geoinformatics and Data Science** Xiaogang Ma,Matty Mookerjee,Leslie Hsu,Denise Hills,2023-04-11 The chapters in this Special Paper present the latest progress and discoveries in both the methodology and technology of geoinformatics The methodologies technologies and best practices will make this volume a useful reference with long term impacts for data intensive geoscience in the next decade and beyond The Popular Science Monthly ,1884 *Adventureland in Preschool* Kym Statum,2009-05-19 A preschool curriculum geared towards three to five year old children Includes art science math sensory literature activities reproducible pages and more 125 pages full color **Socialist India** ,1974 **Scientific Publications** Great Britain: Parliament: House of Commons: Science and Technology Committee,Great Britain.
