Applied Deep Learning and Computer Vision for Self-Driving Cars Sumit Ranjan, Dr. S. Senthamilarasu, 2020-08-14
Explore self driving car technology using deep learning and artificial intelligence techniques and libraries such as TensorFlow Keras and OpenCV
Key Features
Build and train powerful neural network models to build an autonomous car
Implement computer vision deep learning and AI techniques to create automotive algorithms
Overcome the challenges faced while automating different aspects of driving using modern Python libraries and architectures
Book Description
Thanks to a number of recent breakthroughs self driving car technology is now an emerging subject in the field of artificial intelligence and has shifted data scientists focus to building autonomous cars that will transform the automotive industry
This book is a comprehensive guide to use deep learning and computer vision techniques to develop autonomous cars
Starting with the basics of self driving cars SDCs this book will take you through the deep neural network techniques required to get up and running with building your autonomous vehicle
Once you are comfortable with the basics you ll delve into advanced computer vision techniques and learn how to use deep learning methods to perform a variety of computer vision tasks such as finding lane lines improving image classification and so on
You will explore the basic structure and working of a semantic segmentation model and get to grips with detecting cars using semantic segmentation
The book also covers advanced applications such as behavior cloning and vehicle detection using OpenCV transfer learning and deep learning methodologies to train SDCs to mimic human driving
By the end of this book you ll have learned how to implement a variety of neural networks to develop your own autonomous vehicle using modern Python libraries
What you will learn
Implement deep neural network from scratch using the Keras library
Understand the importance of deep learning in self driving cars
Get to grips with feature extraction techniques in image processing using the OpenCV library
Design a software pipeline that detects lane lines in videos
Implement a convolutional neural network CNN image classifier for traffic signal signs
Train and test neural networks for behavioral cloning by driving a car in a virtual simulator
Discover various state of the art semantic segmentation and object detection architectures
Who this book is for
If you are a deep learning engineer AI researcher or anyone looking to implement deep learning and computer vision techniques to build self driving blueprint solutions this book is for you
Anyone who wants to learn how various automotive related algorithms are built will also find this book useful
Python programming experience along with a basic understanding of deep learning is necessary to get the most of this book
Strategic Management Jeffrey H. Dyer, Paul Godfrey, Robert Jensen, David Bryce, 2017-10-16
Strategic Management delivers an insightful and concise introduction to strategic management concepts utilizing a strong mix of real world contemporary examples
Written in a conversational style this product sparks ideas fuels creative thinking and discussion while engaging students with the concepts they are studying
Virtual Screening Mutasem Taha, 2012-03-14
Pharmacophore modeling QSAR analysis CoMFA CoMSIA docking and molecular dynamics simulations are currently

implemented to varying degrees in virtual screening towards discovery of new bioactive hits Implementation of such techniques requires multidisciplinary knowledge and experience This volume discusses established methodologies as well as new trends in virtual screening with aim of facilitating their use in drug discovery
