*British Government and Politics* Michael L. Mannin, 2010-01-16 This deeply informed text sets the government and politics of Britain firmly in the context of Britain's enduring membership in the European Union Michael L Mannin thoroughly applies the concept of Europeanization across the political system to explore how far change is a product of Britain's interdependent relationship with the EU He shows how the EU's treaty relationships present new challenges to sovereign states especially Britain whose psyche has long revolved around iconic notions of Parliamentary sovereignty imperial power national independence and an assumed cultural homogeneity Examining the cultural economic and social background to Britain's twenty first century politics Mannin challenges some of the historical myths on which Britain's exceptionalism is founded He then analyzes contemporary political institutions and processes in the context of Europeanization as well as the impact of the EU on policy and policy making Ideal for courses in British and European politics this book breaks new ground in exploring the complex interdependence that the EU should bring to the study of European political systems

*Constructions of Migrant Integration in British Public Discourse* Sam Bennett, 2018-01-25 This is a study into how the public discourse on migrant integration in the UK changed from 2000 2010 The book shows that the discursive construction of integration in the British public sphere shifted from one of cultural pluralism to one of neo assimilation informed by a wider spread of neo liberalism that necessitates self sufficiency and discourages state assistance Situated within the Critical Discourse Studies tradition the book employs a Discourse Historical approach to the data and includes innovative analysis combining top down policy documents and media texts and bottom up focus groups with migrants and new citizens sites of discourse production In doing so it provides a broad and detailed perspective of public discourse on integration in the UK The book shows that understandings of integration are diachronically and synchronically fluid and as such the term plays an important role as a consensus concept that different actors can support whilst construing it in different ways Analysis of the data further reveals that integration is interdiscursively linked to other social fields such as the economy terrorism and public spending The book also argues that integration policy has become directed not just at new migrants but also long term British citizens and that this has the potential to have considerable impact on community cohesion

original interpretation of Britain's relationship with Europe over a 25 year period 1959-84 and advances the argument that the current problems over EU membership resulted from much earlier political machinations This evidence based account of the seminal period analyses the applications for EEC membership the 1975 referendum and the role of the press Was the British public misled over the true aims of the European project How significant was the role of the press in changing public opinion from anti to pro Common Market membership Why after over 40 years since Britain became a member of the European community does the issue continue to deeply divide not only the political elite but also the British public These and other pertinent questions are answered in this timely book on a subject that remains topical and highly controversial
