*Dictionary of Political Economy* Robert Harry Inglis Palgrave,1894     **Remaking Eastern Europe – On the Political Economy of Transition** J.M. Van Brabant,2012-12-06 This compact volume is meant as a modest contribution to the ongoing debate on how to transform in particular the radically reforming Eastern European economies into more productive sociopolitical organizations Although my main focus here is on the economics of reform and east west assistance I have tried to embed the multiple technical aspects of restructuring such a resource allocation into the context of remaking Eastern Europe That the volume coincides with the seminal transformations of the communist countries of Eastern Europe is of course not fortuitous But I shall have much less to say about the political transitions from communism to parliamentary democracy except the ways in which the latter may bolster or hinder the hoped for economic mutations In taking stock of where I stand on the issue of radical reform of planned economics in general and the CMEA in particular both still moving targets I have benefited greatly from participation in formal and informal conferences on economic reform The product has also profited from many informal discussions and exchanges of views among friends and colleagues including those entrusted with and purely interested in efforts on the overall topic of the study launched from within the broad context of the United Nations my at times reluctant employer     *Walford's Guide to Reference Material: Social and historical sciences, philosophy and religion* Albert John Walford, Marilyn Mullan, Priscilla Schlicke, Library Association, 1999 A revised and updated guide to reference material It contains selective and evaluative entries to guide the enquirer to the best source of reference in each subject area be it journal article CD ROM on line database bibliography encyclopaedia monograph or directory It features full critical annotations and reviewers comments and comprehensive author title and subject indexes The contents include philosophy and psychology religion social sciences sociology statistics politics economics labour and employment land and property business organizations finance and banking and economic surveys economic policies and controls trade and commerce business and management and law public administration social services and welfare education customs and traditions geography biography and history     **Dictionary of Political Economy** Robert Harry Inglis Palgrave,1915     **Handbook of Political Science Research on the USSR and Eastern Europe** Ray Taras,1992-10-23 This critical history of and guide to Soviet studies aims to take stock of the achievements and shortcomings in Western research on the region s politics and to serve as a who s who of Western Sovietologists identifying many prominent political scientists from the former Communist states     *Industrial Policy in Eastern Europe* J.M. Van Brabant,2012-12-06 This volume in essence continues my recent contributions towards building up a better understanding of the wide range of obstacles besetting the transitions away from administrative planning in the former communist regimes in the eastern part of Europe It is self contained however As such it specifically addresses issues revolving around how best to govern economies and indeed societies more generally that are undergoing fundamental structural transformation and whether industrial

policy can facilitate progressing with the vexing transformations that will have to be enacted over a protracted period of time Because of the bewildering variety of hindrances that the managers of the transition have been confronted with many of which were not even contemplated when the programs were first designed regaining a measure of good governance including notably good economic governance is critical in formulating a positive political economy of transition Arguably most critical is steering the processes of destruction and creation not creative destruction in the Schumpeterian sense In some cases this requires reallocating decommissioned resources both capital and labor to new activities Changing rules on the utilization of existing assets is evidently at the core of what the transition towards market based economic systems should be all about Very often however this requires establishing new economic activities from domestic and foreign savings

**European Access** ,2002      Ulrich's International Periodicals Directory Carolyn Farquhar Ulrich,2001      Political Economy of Transition Jozef M. van Brabant,2012-11-12 This book addresses the policy questions surrounding the challenge of transforming eastern European economies from their planned administrative past to vibrant market based entities Jozef van Brabant considers in turn the wider set of challenges facing these economies stabilization privatization liberalization institution building and developing and maintaining the sociopolitical consensus before examining the evolving role of the state Using concrete examples from the eastern European countries throughout including the Czech Republic and Bulgaria this work systematically examines in a society wide context the initial conditions of transformation the policy tasks ahead and the manner in which policies have been pursued      Information Sources of Political Science Stephen W. Green,2005-07-15 This comprehensive political bibliography offers 2500 entries covering a wide variety of source types indexing and abstracting services major bibliographical tools encyclopaedias dictionaries handbooks directories statistical compilations and more      **East European Accessions List** ,1957      *Bibliographic Guide to Soviet and East European Studies* ,1980
