**Study of Political Change in Britain, 1963-1970** David Butler, 1979 Britain's Last Religious Revival? C.

Field, 2015-02-25 This is a major contribution to scholarly debates on the chronology and nature of secularization in modern Britain. Combining historical and social scientific insights, it analyses a range of statistical evidence for the long 1950s testing and largely rejecting Callum Brown's claims that there was a religious resurgence during this period. *Secularization in the Long 1960s* Clive D. Field, 2017 Using empirical research, this study provides a clear guide to the current state of the debate surrounding secularization in Britain during the long 1960s.

**Voter Turnout and the Dynamics of Electoral Competition in Established Democracies Since 1945** Mark N. Franklin, 2004-04-19

Voting is a habit. People learn the habit of voting or not based on experience in their first few elections. Elections that do not stimulate high turnout among young adults leave a footprint of low turnout in the age structure of the electorate as many individuals who were new at those elections fail to vote at subsequent elections. Elections that stimulate high turnout leave a high turnout footprint. So a country's turnout history provides a baseline for current turnout that is largely set except for young adults. This baseline shifts as older generations leave the electorate and as changes in political and institutional circumstances affect the turnout of new generations. Among the changes that have affected turnout in recent years, the lowering of the voting age in most established democracies has been particularly important in creating a low turnout footprint that has grown with each election.

Young People and Politics Aaron J. Martin, 2012 This book examines young people's political engagement in the Anglo-American democracies. It is often alleged that young people are disengaged from politics on a number of levels. The commonly held view is that young people don't vote, they do not trust politicians, and have low levels of political interest. But is this true? Where is it true and to what extent? Examining voter turnout, political trust, political interest, electoral and non-electoral forms of participation, and Internet use, this book provides a comprehensive account of young people's political engagement in the US, Britain, Canada, and Australia. In doing so, this book challenges the conventional wisdom on a number of fronts by showing young people's political engagement to be much more complicated than many of the stereotypes suggest in both good and bad ways. In this way, this book provides a report card on young people's political engagement in the twenty-first century. *Young People and Politics* will be of interest to students and scholars of political science, comparative politics, public policy, and sociology, particularly those with a focus on young people and politics, political participation, and public opinion.

**Voters Under Pressure** Ruth Dassonneville, 2022-11-28 This book examines changes in voters' electoral choices over time and investigates how these changes are linked to a growth in electoral volatility. Ruth Dassonneville's core argument, supported by extensive empirical data, is that group-based cross pressures lead to instability in voters' choices. She theorizes that when citizens' socio-demographic characteristics and their membership of social groups do not consistently push them to support one party but instead lead them to feel cross-pressured between parties, their voting decision process

lacks constraint Voters who are group based cross pressured are less likely to feel an attachment to a party and have less guidance when assessing the state of the economy when taking positions on issues or evaluating leaders The different factors that influence voters choices as a result do not add up to strengthening a preference for one specific party but instead lead a voter to consider different parties To test this argument the book makes use of election survey data from eight established democracies that allow the study of voting behaviour and its correlates over several decades These data are complemented with data from the European Election Studies project and from election study panels The book shows that group based cross pressures are an important source of instability as they affect the extent to which citizens voting decision process is structured This is evident from the fact that cross pressured voters are more ambivalent between parties make their voting decision later and are more likely to switch parties from one election to the next Comparative Politics is a series for researchers teachers and students of political science that deals with contemporary government and politics Global in scope books in the series are characterized by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit [www.ecprnet.eu](http://www.ecprnet.eu) The series is edited by Nicole Bolleyer Chair of Comparative Political Science Geschwister Scholl Institut LMU Munich and Jonathan Slapin Professor of Political Institutions and European Politics Department of Political Science University of Zurich

The Brief and Turbulent Life of Modernising Conservatism

Stuart Mitchell, 2006 The Brief and Turbulent Life of Modernising Conservatism is an examination of government tensions and frustrations during a time of economic and social flux It concentrates on the development of domestic industrial policy in the Conservative Party between 1945 and 1964 with particular emphasis on Harold Macmillan TM s and Sir Alec Douglas Home TM s administrations Between the general elections of 1959 and 1964 the Conservative Government effected a series of striking and dangerously controversial policy transformations in response to its recognition of Britain TM s relative economic decline These adjustments were both practical and strategic The administration TM s aim was extraordinarily ambitious It sought to fashion a recognisably modern and dynamic yet socially stable nation that could retain its place in the international c lite Thereby the Party hoped to ensure its own continuation in power The author considers policy innovations that included an ill starred attempt to join the European Community the development of macro economic planning and the abolition of resale price maintenance an exploit which roused the Tory Party to unusual heights of passion The book does not simply regurgitate an orthodox high political narrative Instead it investigates topics of interest to modern historians and political scientists alike It
