China's Gilded Age Yuen Yuen Ang, 2020-05-28 Why has China grown so fast for so long despite vast corruption In China's Gilded Age Yuen Yuen Ang maintains that all corruption is harmful but not all types of corruption hurt growth Ang unbundles corruption into four varieties petty theft grand theft speed money and access money While the first three types impede growth access money elite exchanges of power and profit cuts both ways it stimulates investment and growth but produces serious risks for the economy and political system Since market opening corruption in China has evolved toward access money Using a range of data sources the author explains the evolution of Chinese corruption how it differs from the West and other developing countries and how Xi's anti corruption campaign could affect growth and governance In this formidable yet accessible book Ang challenges one dimensional measures of corruption By unbundling the problem and adopting a comparative historical lens she reveals that the rise of capitalism was not accompanied by the eradication of corruption but rather by its evolution from thuggery and theft to access money In doing so she changes the way we think about corruption and capitalism not only in China but around the world

Western Perspectives On The People's Republic Of China: Politics, Economy And Society Colin Mackerras, 2015-03-05 How have Westerners seen the People's Republic of China over the years The question raises many important issues which this book aims to present analyze and explain The basic conclusion is that Western perspectives are somewhat more complex than simply viewing China's realities Involved also are politics and power relations trends in

journalism and scholarship as well as individual and group personalities and psychologies Based on extensive personal experiences in China dating back to 1964 and wide ranging travel in Tibet and ethnic regions since the 1980s the author attempts to distinguish trends in different Western countries However most of the material will concern the United States which has been the dominant contributor to Western perspectives during the whole period of concern to this book The perspectives are taken up by topic including politics economy society and ethnic minorities Inherent in each topic is the way cultures see and react towards each other Images and perspectives can affect policy and have done so many times in the past which adds to the importance of this book It also takes up questions of the sources of Western perspectives both in terms of direct sources such as newspapers television or the internet and deeper ones such as social values and temperament

Greed, Corruption, and the Modern State Susan Rose-Ackerman, Paul Lagunes, 2015-09-25 What makes the control of corruption so difficult and contested Drawing on the insights of political science economics and law the expert contributors to this book offer diverse perspectives One group of chapters explores the nature of corruption in democracies and autocracies and reforms that are mere facades Other contributions examine corruption in infrastructure tax collection cross border trade and military procurement Case studies from various regions such as China Peru South Africa and New York City anchor the analysis with real world situations The book pays particular attention to corruption involving international business and the domestic regulation of foreign bribery *The Encyclopedia of Public Choice* Charles Rowley, Friedrich Schneider, 2004-07-06 The Encyclopedia provides a detailed and comprehensive account of the subject known as public choice However the title would not convey sufficiently the breadth of the Encyclopedia's contents which can be summarized better as the fruitful interchange of economics political science and moral philosophy on the basis of an image of man as a purposive and responsible actor who pursues his own objectives as efficiently as possible This fruitful interchange between the fields outlined above existed during the late eighteenth century during the brief period of the Scottish Enlightenment when such great scholars as David Hume Adam Ferguson and Adam Smith contributed to all these fields and more However as intellectual specialization gradually replaced broad based scholarship from the nineteenth century onwards it became increasingly rare to find a scholar making major contributions to more than one Once Alfred Marshall defined economics in neoclassical terms as a narrow positive discipline the link between economics political science and moral philosophy was all but severed and economists redefined their role into that of the humble dentist providing technical economic information as inputs to improve the performance of impartial benevolent and omniscient governments in their attempts to promote the public interest This indeed was the dominant view within an economics profession that had become besotted by the economics of John Maynard Keynes and Paul Samuelson immediately following the end of the Second World War

On October 1 2009 the People's Republic of China PRC celebrated the 60th anniversary of its founding And what an eventful and tumultuous six decades it had been During that time under the leadership of the Chinese Communist Party CCP China was transformed from one of the world's poorest countries into the world's fastest growing major economy and from a weak state barely able to govern or protect its own territory to a rising power that is challenging the United States for global influence Over those same years the PRC also experienced the most deadly famine in human history caused largely by the actions and inactions of its political leaders Not long after there was a collapse of government authority that pushed the country to the brink of and in some places actually into civil war and anarchy Today China is for the most part peaceful prospering and proud This is the China that was on display for the world to see during the Beijing Olympics in 2008 The CCP maintains a firm grip on power through a combination of popular support largely based on its recent record of promoting rapid economic growth and harsh repression of political opposition Yet the party and country face serious challenges on many fronts including a slowing economy environmental desecration pervasive corruption extreme inequalities and a rising tide of social protest
