Political Economy Of Environmental Protection Volume24:

The Political Economy of Environmental Protection Horst Siebert, Ariane Berthoin Antal, 1979 **Building a Black Criminology, Volume 24** James D. Unnever, Shaun L. Gabbidon, Cecilia Chouhy, 2018-10-26 In light of the Black Lives Matter movement and protests in many cities race plays an ever more salient role in crime and justice Within theoretical criminology however race has oddly remained on the periphery It is often introduced as a control variable in tests of theories and is rarely incorporated as a central construct in mainstream paradigms e g control social learning and strain theories When race is discussed the standard approach is to embrace the racial invariance thesis which argues that any racial differences in crime are due to African Americans being exposed to the same criminogenic risk factors as are Whites just more of them An alternative perspective has emerged that seeks to identify the unique racially specific conditions that only Blacks experience Within the United States these conditions are rooted in the historical racial oppression experienced by African Americans whose contemporary legacy includes concentrated disadvantage in segregated communities racial socialization by parents experiences with and perceptions of racial discrimination and disproportionate involvement in and unjust treatment by the criminal justice system Importantly racial invariance and race specificity are not mutually exclusive perspectives Evidence exists that Blacks and Whites commit crimes for both the same reasons invariance and for different reasons race specific A full understanding of race and crime thus must involve demarcating both the general and specific causes of crime the latter embedded in what it means to be Black in the United States This volume seeks to explore these theoretical issues in a depth and breadth that is not common under one cover Again given the salience of race and crime this volume should be of interest to a wide range of criminologists and have the potential to be used in graduate seminars and upper level undergraduate courses **The Economics of Exploration for Energy Resources** James Bernard Ramsey, 1981
