Policing Places With Drug Problems:

Policing Places With Drug Problems Lorraine Green Mazerolle, 1996 This valuable study integrates concepts from environmental criminology and problem oriented policing in a rigorous evaluation of civil remedies used to inhibit drug dealing Ronald V Clarke Dean School of Criminal Justice Rutgers University Policing Places with Drug Problems is well written current and interesting In particular it is by far the best description that I have read on the topic of place oriented strategies of crime control The integration of the literature on different strategies is outstanding The book will make an important contribution to the field Police officers and administrators as well as academics researchers and policymakers will find the literature review and research interesting and informative Doris L MacKenzie University of Maryland at College Park SMART inspections began as an innovative search for alternative ways to solve community problems This book captures the essence of the program its positive results and raises issues about the future of police problem solving efforts Bob Crawford Founder Beat Health Unit Oakland Police Department In Policing Places with Drug Problems Lorraine Green has paid close attention to the lessons of the new criminology of crime prevention Her methods are cautious and thoughtful and tailor made to the substantive problems she examines This is one of the first major criminal justice evaluations to rely heavily on computer mapping technologies Accordingly Green draws from a broad array of data but links them to the places where the interventions are practiced Her conclusions hold particular weight because she has selected a case study that provides a clear and powerful test of the crime prevention components that it employs This is an important book with significant research and policy implications Its message about policing is one that should be heard by both scholars and policymakers It provides us with not only guidance from a successful case study but also new and important evidence about the ability of criminal justice agents to do something about crime from the Foreword by David Weisburd The Hebrew University Jerusalem Timely and informative Policing Places with Drug Problems focuses on the success of nontraditional place oriented drug control strategies in cities across the nation In her perceptive case study author Lorraine Green examines SMART Specialized Multi Agency Response Team a program developed by an innovative police practitioner Sergeant Bob Crawford of the Oakland Police Department As an alternative to arrest oriented strategies SMART engages active enforcement of civil codes and regulatory rules to clean up drug centers encouraging citizens landlords and business owners to work with police in a community effort at drug abatement In her careful analysis the author studies the extent to which deviant places can be changed as well as the implications of implementing nontraditional street level drug control strategies A new contribution to policing innovation this volume concludes with a thoughtful discussion of the challenges that face cities developing alternative drug policing programs An excellent resource Policing Places with Drug Problems provides a must read analysis of place oriented drug control strategies of particular interest to researchers practitioners policymakers academics and students in criminology criminal law policing urban studies and social work **The Encyclopedia of Police Science** Jack

R. Greene, 2007 First published in 1996 this work covers all the major sectors of policing in the United States Political events such as the terrorist attacks of September 11 2001 have created new policing needs while affecting public opinion about law enforcement This third edition of the Encyclopedia examines the theoretical and practical aspects of law enforcement discussing past and present practices *The Oxford Handbook of Police and Policing* Michael Dean Reisig, Robert J. Kane, 2014 The police are perhaps the most visible representation of government They are charged with what has been characterized as an impossible mandate control and prevent crime keep the peace provide public services and do so within the constraints of democratic principles The police are trusted to use deadly force when it is called for and are allowed access to our homes in cases of emergency In fact police departments are one of the few government agencies that can be mobilized by a simple phone call 24 hours a day 7 days a week They are ubiquitous within our society but their actions are often not well understood *Drug Abuse: Prevention and Treatment* Mangai Natarajan, 2017-05-15 Ever since the Shanghai convention in 1909 the threat posed to human well being by drug abuse has led countries around the world to take action to deal with their drug problems There are wide variations in the policies pursued but most countries try to reduce both the supply of and the demand for drugs Unfortunately there is little research consensus on the respective merits of these two approaches or about the best ways to pursue them Consequently control and prevention policies are mostly driven by political considerations economic realities and cultural expectations though research has played an important part in formulating and evaluating treatments for drug addiction This volume reviews studies on drug abuse prevention and treatment strategies under five main areas 1 Reducing supply strategies to control the flow of drugs from production to retail distribution 2 Reducing demand prevention of drug use at all stages of involvement and consumption levels 3 Reducing harm promoting situational risk reduction practices for regular users addicts and recreational users 4 Reducing addiction drug treatment options for various groups in various settings and 5 Drug policies and prescriptions focused on debates about prohibition and legalization *Encyclopedia of Police Science* Jack Raymond Greene, 2006-10-23 In 1996 Garland published the second edition of the Encyclopedia of Police Science edited by the late William G Bailey The work covered all the major sectors of policing in the US Since then much research has been done on policing issues and there have been significant changes in techniques and in the American police system Technological advances have refined and generated methods of investigation Political events such as the terrorist attacks of September 11 2001 in the United States have created new policing needs while affecting public opinion about law enforcement These developments appear in the third expanded edition of the Encyclopedia of Police Science 380 entries examine the theoretical and practical aspects of law enforcement discussing past and present practices The added coverage makes the Encyclopedia more comprehensive with a greater focus on today's policing issues Also added are themes such as accountability the culture of police and the legal framework that affects police decision New topics discuss recent issues such as Internet and crime international terrorism airport safety or

racial profiling Entries are contributed by scholars as well as experts working in police departments crime labs and various fields of policing *Applied Police Research* Ella Cockbain, Johannes Knutsson, 2014-09-15 Remarkably little has been written about the theory and practice of applied police research despite growing demand for evidence in crime prevention Designed to fill this gap this book offers a valuable new resource It contains a carefully curated selection of contributions from some of the world's leading applied police researchers Together the authors have almost 300 years of relevant experience across three continents The volume contains both practical everyday advice and calls for more fundamental change in how police research is created consumed and applied It covers diverse topics including the art of effective collaborations the interaction between policing academia and policy the interplay between theory and practice and managing ethical dilemmas This book will interest a broad and international audience from academics and students to police management officers and trainees to policymakers and research funders The Prevention of Substance Use, Risk and Harm in Australia: Monograph Wendy Loxley, 2004 Encyclopedia of Law Enforcement: State and local law enforcement Larry E. Sullivan, 2005 Vols 1 and 2 cover U S law enforcement Vol 3 contains articles on individual foreign nations together with topical articles on international law enforcement **American Book Publishing Record**, 1996 **Crime Control in America** John L. Worrall, 2006 Can business activity in itself be morally good and pleasing to God Sometimes business can seem so shady manipulating the bottom line deceiving the consumer or gaining promotions because of whom you know But Wayne Grudem introduces a novel concept business itself glorifies God when it is conducted in a way that imitates God's character and creation He shows that all aspects of business including ownership profit money competition and borrowing and lending glorify God because they are reflective of God's nature Though Grudem isn't naive about the easy ways these activities can be perverted and used as a means to sin he knows that Christians can be about the business of business This biblically based book is a thoughtful guide to imitating God during interactions with customers coworkers employees and other businesses See how your business and your life in business can be dedicated to God's glory *Drugs and Crime in Public Housing* Terence Dunworth, 1994 **Crime Prevention Through Environmental Design** Garland F. White, 2006 This book argues that the level of social and physical capital in communities can influence the amount of crime Communities are conceived as varying across positive weak or negative levels of social and physical capital Negative social and physical capital produce higher levels of disorder and crime Conversely positive social and physical capital enables residents to lower social problems in communities Weak social and physical capital allows more disorder because the community's defenses against crime and disorder are not strong enough to combat these problems The general perspectives include broken windows defensible space hot spots collective efficacy social disorganization underclass gang communities the post industrialized communities and routine activities theory The ameliorative programs include the weed and seed program the moving to opportunity program community policing and empowerment zones Modern Policing and the Control of Illegal
