under globalization: whither the gains from reforms? Augusto de la Torre, Sergio L. Schmukler, Juan Carlos Gozzi, 2007 Abstract Over the past decades many countries have implemented significant reforms to foster domestic capital market development These reforms included stock market liberalization privatization programs and the establishment of regulatory and supervisory frameworks Despite the intense reform efforts the performance of capital markets in several countries has been disappointing To study whether reforms have had the intended effects on capital markets the authors analyze the impact of six capital market reforms on domestic stock market development and internationalization using event studies They find that reforms tend to be followed by significant increases in domestic market capitalization trading and capital raising Reforms are also followed by an increase in the share of activity in international equity markets with potential negative spillover effects on domestic markets *Economic Globalisation* Clement Allan Tisdell, Raj Kumar Sen, 2004-01-28 In this

Studies , 2007 The Globalization of Supermax Prisons Jeffrey Ian Ross, 2013-02-10 Supermax prisons conceived by the United States in the early 1980s are typically reserved for convicted political criminals such as terrorists and spies and for other inmates who are considered to pose a serious ongoing threat to the wider community to the security of correctional institutions or to the safety of other inmates Prisoners are usually restricted to their cells for up to twenty three hours a day and typically have minimal contact with other inmates and correctional staff Not only does the Federal Bureau of Prisons operate one of these facilities but almost every state has either a supermax wing or stand alone supermax prison The

Globalization of Supermax Prisons examines why nine advanced industrialized countries have adopted the supermax prototype paying particular attention to the economic social and political processes that have affected each state Featuring essays that look at the U S run prisons of Abu Ghraib and Guantanamo this collection seeks to determine if the American model is the basis for the establishment of these facilities and considers such issues as the support or opposition to the building of a supermax and why opposition efforts failed the allegation of human rights abuses within these prisons and the extent to which the decision to build a supermax was influenced by developments in the United States Additionally contributors address such domestic matters as the role of crime rates media sensationalism and terrorism in each country s decision to build a supermax prison **Dissent** ,2005 The Political Economy of Globalization Satya Dev

Gupta,2012-12-06 Globalization is transforming the world at an accelerated pace Integration of the world continues widening and intensifying international linkages in economic political and social relations Liberalization of trade and finance lubricated by revolutionary changes in information technology has resulted in significant economic growth at the global level On the other hand the process of globalization is changing the nature of production relations threatening the traditional roles of the nation state and carrying with it far reaching implications for sustainable growth development and the environment Although both developed and developing countries are actively participating in this saga of globalization nearly ninety countries as the United Nations Human Development Report 1996 indicates are worse off economically than they were ten years ago leading to global polarization between haves and have nots The report further indicates that the gap between the per capita incomes of the industrialized world and the developing countries far from narrowing has more than tripled during the last thirty years Further a majority of the countries benefitting from this globalization drive have seen a rise in inequality and poverty This failure of market driven globalization to reward the benefits equitably led the United Nations to proclaim 1996 as the International Year for the Eradication of Poverty IYEP and the decade of 1997 2006 as the international decade for the eradication of poverty and to promote people centered sustainable development **Political Science Quarterly** ,2009

Democratic Internationalism ,2004 *International Politics* ,2008 **International Affairs** ,2003 **Stock Market Development Under Globalization** Augusto de la Torre,2007 Over the past decades many countries have implemented significant reforms to foster domestic capital market development These reforms included stock market liberalization privatization programs and the establishment of regulatory and supervisory frameworks Despite the intense reform efforts the performance of capital markets in several countries has been disappointing To study whether reforms have had the intended effects on capital markets the authors analyze the impact of six capital market reforms on domestic stock market development and internationalization using event studies They find that reforms tend to be followed by significant increases in domestic market capitalization trading and capital raising Reforms are also followed by an increase in the share of activity in international equity markets with potential negative spillover effects on domestic markets *Latin American Research*

Review ,2007 **Globalization and Social Policy** Nicola Yeates,2001-08-21 This book exhibits the characteristics of all good social policy texts It is fired by a commitment to welfare It is informed by extensive multidisciplinary scholarship It debunks fashionable myths Nicola Yeates argues convincingly that while globalization in its many manifestations and dimensions economic cultural and political has to be built into the analytical framework used by social policy scholars globalizing pressures are not immutable nor guaranteed success in overriding local and national social and political forces Essential reading on all social policy courses Bob Deacon Professor of Social Policy University of Sheffield STAKES Finland Many social scientists have not yet woken up to the fact that globalization has transformed the nature of social policy The severity and the causes of many problems are harder to pin down research and teaching programmes have to be re cast This book offers a penetrating assessment of the changes that have to be made Peter Townsend Professor of International Social Policy LSE This timely textbook critically evaluates the relevance and implications of globalisation in relation to both the academic study of social policy and social welfare provision Globalisation and Social Policy Examines the implications of globalization for social policy analysis and provision Analyses how social policies and politics contribute to and shape globalizing strategies Argues that the degree to which globalization gives rise to systematic changes in the funding regulation and provision of welfare has been overestimated and Demonstrates that national and local forces remain decisive in understanding the development of social policy Globalization and Social Policy provides an invaluable guide to the expanding field It provides a refreshing antidote to victorious and defeatist accounts of globalization and its implications for social welfare and argues that politics matter now as much as they ever did It will be welcomed by all students of social policy and will also be of interest to other social science students engaged in issues of globalization
