, 2003 *The Political Economy of Rule Evasion and Policy Reform* Jim Leitzel, 2002 This book develops the logic underlying the connections between breaking the rules and making the rules Approaching policy issues from this point of view provides a perspective that illuminates a wide variety of phenomena **Economic Models for Policy Making** Solomon Cohen, 2013-05-02 Over the past decades many different kinds of models have been developed that have been of use to policy makers but until now the different approaches have not been brought together with a view to enhancing the systematic unification and evaluation of these models This new volume aims to fill this gap by bringing together four decades worth of work by S I Cohen on economic modelling for policy making Work on older models has been rewritten and brought fully up to date and these older models have therefore been brought back to the fore both to assess how they influenced more recent models and to see how they could be used today The focus of the book is on models for development policies in developing economies but there are some chapters that relate to economic policies in transition and developed economies The policy areas covered are of typical interest in developing and transition economies They include those relating to trade liberalization reforms sustainable development industrial development agrarian reform growth and distribution human resource development and education public goods and income transfers Each chapter contains a brief assessment of the empirical literature on the economic effects of the policy measures discussed in the chapter The book presents a platform of economic modelling that can serve as a refresher for practising professionals as well as a reference companion for graduates engaging in economic modelling and policy preparations *Capital, Exploitation and Economic Crisis* John

Weeks, 2011-03-15 In 2008 the capitalist world was swept by the severest crisis since the Great Depression of the 1930s Mainstream economics neither anticipated nor could account for this disastrous financial crisis which required massive state intervention throughout the capitalist world Karl Marx did anticipate this type of financial collapse arguing that it was derivative from the fetishism of commodities inherent in the capitalist mode of production This book substantiates the foregoing claim by a journey from Marx's analysis of commodities to the capitalist crisis of the twenty first century The book demonstrates that Marx's framework 1 demonstrates that capitalism is but one historical form of class society among many 2 explains the transition from pre capitalist to capitalist society 3 reveals the concrete operation of a capitalist economy and 4 shows why others would explain the capitalist economy in alternative theoretical frameworks The central element in his framework from which all else derives is the theory of value This book is not an exercise in the history of thought It is an attempt to analyze the nature of contemporary capitalist society While Marx's analysis of capitalism has implications for

political action these need not lead one to embrace revolution in place of reform though it can and has provided the analytical foundation for both Marx's analysis of capitalism is a coherent whole and meaningful insights cannot be obtained by extracting elements from it Weeks starts out by looking at the nature of capitalism and an analysis circulation money and credit unfold from the theory of value The nature and inherent necessity of competition are demonstrated in chapter eight A consequence of competition expressed in the movement of capital is technical change the contradictory impact of which is explained in chapter nine This is brought together with the other elements of value theory money credit and competition in chapter ten where economic crises are treated in detail The final chapter applies the theory of crisis to the extreme financial disturbances of the 2000s This book should be of interest to students and researchers of economics politics and sociology
