Political Economy Of Urban Schools:

The Political Economy of Urban Schools Martin T. Katzman, 1971 No detailed description available for *The Political Economy of Urban Schools* **Ghetto Schooling** Jean Anyon, 1997-09-19 In this disturbing but ultimately hopeful personal account Jean Anyon provides compelling evidence that the economic and political devastation of America's inner cities has robbed schools and teachers of the capacity to successfully implement current strategies of educational reform. She argues that without fundamental change in government and business policies and the redirection of major resources back into the schools and the communities they serve, urban schools are consigned to failure and no effort at raising standards, improving teaching, or boosting achievement can occur. Based on her participation in an intensive four-year school reform project in the Newark, New Jersey public schools, the author vividly captures the anguish and anger of students and teachers caught in the tangle of a failing school system. *Ghetto Schooling* offers a penetrating historical analysis of more than a century of government and business policies that have drained the economic, political, and human resources of urban populations. Provocative and controversial, this book reveals the historical roots of the current crisis in ghetto schools and what must be done to reverse the downward spiral. *The Political Economy of Urban Schools* Martin T. Katzman, 1971 **The New**

Political Economy of Urban Education Pauline Lipman, 2013-05-13 Using Chicago as a case study of the interconnectedness of neoliberal urban policies on housing, economic development, race, and education, Lipman explores larger implications for equity, justice, and the right to the city. **City Schools and City Politics** John Portz, Lana Stein, Robin R. Jones, 1999 An explanation of why some US cities are better at educational reform than others. It relates education to politics, showing how the whole village can be mobilized to better educate tomorrow's citizens. It is based on an 11-city study of civic capacity and urban education. **The Political Economy of Urban School** Martin T. Katzman, 1971

Changing Urban Education Clarence Nathan Stone, 1998 With critical issues like desegregation and funding facing our schools, dissatisfaction with public education has reached a new high. Teachers decry inadequate resources while critics claim educators are more concerned with job security than effective teaching. Though urban education has reached crisis proportions, contending players have difficulty agreeing on a common program of action. This book tells why. *Changing Urban Education* confronts the prevailing naivete in school reform by examining the factors that shape, reinforce, or undermine reform efforts. Edited by one of the nation's leading urban scholars, it examines forces for change and resistance in urban education and proposes that the barrier to reform can only be overcome by understanding how schools fit into the broader political contexts of their cities. Much of the problem with our schools lies with the reluctance of educators to recognize the profoundly political character of public education. The contributors show how urban political contexts vary widely with factors like racial composition, the role of the teachers union, and relations between cities and surrounding metropolitan areas. Presenting case studies of original field research in Baltimore, Chicago, Houston, and six other urban areas, they consider how

resistance to desegregation and the concentration of the poor in central urban areas affect education and they suggest how cities can build support for reform through the involvement of business and other community players By demonstrating the complex interrelationship between urban education and politics this book shows schools to be not just places for educating children but also major employers and large spenders of tax dollars It also introduces the concept of civic capacity the ability of educators and non educators to work together on common goals and suggests that this key issue must be addressed before education can be improved Changing Urban Education makes it clear to educators that the outcome of reform efforts depends heavily on their political context as it reminds political scientists that education is a major part of the urban mix While its prognosis is not entirely optimistic it sets forth important guidelines that cannot be ignored if our schools are to successfully prepare children for the future

Radical Possibilities Jean Anyon, 2014-03-14 The core argument of Jean Anyon's classic *Radical Possibilities* is deceptively simple if we do not direct our attention to the ways in which federal and metropolitan policies maintain the poverty that plagues communities in American cities urban school reform as currently conceived is doomed to fail With every chapter thoroughly revised and updated this edition picks up where the 2005 publication left off including a completely new chapter detailing how three decades of political decisions leading up to the Great Recession produced an economic crisis of epic proportions By tracing the root causes of the financial crisis Anyon effectively demonstrates the concrete effects of economic decision making on the education sector revealing in particular the disastrous impacts of these policies on black and Latino communities Going beyond lament *Radical Possibilities* offers those interested in a better future for the millions of America's poor families a set of practical and theoretical insights Expanding on her paradigm for combating educational injustice Anyon discusses the Occupy Wall Street movement as a recent example of popular resistance in this new edition set against a larger framework of civil rights history A ringing call to action *Radical Possibilities* reminds readers that throughout U.S. history equitable public policies have typically been created as a result of the political pressure brought to bear by social movements Ultimately Anyon's revelations teach us that the current moment contains its own very real radical possibilities

Funding Public Schools Kenneth K. Wong, 1999 This book examines the fundamental role of politics in funding our public schools and fills a conceptual imbalance in the current literature in school finance and educational policy Unlike those who are primarily concerned about cost efficiency Kenneth Wong specifies how resources are allocated for what purposes at different levels of the government In contrast to those who focus on litigation as a way to reduce funding gaps he underscores institutional stalemate and the lack of political will to act as important factors that affect legislative deadlock in school finance reform Wong defines how politics has sustained various types of rules that affect the allocation of resources at the federal state and local level While these rules have been remarkably stable over the past twenty to thirty years they have often worked at cross purposes by fragmenting policy and constraining the education process at schools with the greatest needs Wong's examination is shaped by several questions How do these rules come

about What role does politics play in retention of the rules Do the federal state and local governments espouse different policies In what ways do these policies operate at cross purposes How do they affect educational opportunities Do the policies cohere in ways that promote better and more equitable student outcomes Wong concludes that the five types of entrenched rules for resource allocation are rooted in existing governance arrangements and seemingly impervious to partisan shifts interest group pressures and constitutional challenge And because these rules foster policy fragmentation and embody initiatives out of step with the performance based reform agenda of the 1990s the outlook for positive change in public education is uncertain unless fairly radical approaches are employed Wong also analyzes four allocative reform models two based on the assumption that existing political structures are unlikely to change and two that seek to empower actors at the school level The two models for systemwide restructuring aimed at intergovernmental coordination and or integrated governance would seek to clarify responsibilities for public education among federal state and local authorities above all integrating political and educational accountability The other two models identified by Wong shift control from state and district to the school one based on local leadership and the other based on market forces In discussing the guiding principles of the four models Wong takes care to identify both the potential and limitations of each Written with a broad policy audience in mind Wong s book should appeal to professionals interested in the politics of educational reform and to teachers of courses dealing with educational policy and administration and intergovernmental relations The Study of Education: End of an era? Peter Gordon,1980 Power in the City Marion Orr, Valerie C. Johnson,2008 A collection of thirteen essays considered classics in the field of urban politics from leading scholar Clarence Stone with new essays by the editors and by Stone himself that contextualize the impact of his previous works and suggest new directions for researchers **School Reform, Corporate Style** Dorothy Shipps,2006 Like other big city school systems Chicago s has been repeatedly reformed over the last century Yet its schools have fallen far short of citizens expectations and left a gap between the performances of white and minority students Many blame the educational establishment for resisting change Other critics argue that reform occurs too often still others claim it comes not often enough Dorothy Shipps reappraises the tumultuous history of educational progress in Chicago revealing that the persistent lack of improvement is due not to the extent but rather the type of reform Throughout the twentieth century managerial reorganizations initiated by the business community repeatedly altered the governance structure of schools as well as the relationships of teachers to children and parents but brought little improvement while other more promising reform models were either resisted or crowded out Shipps chronicles how Chicago s corporate actors led abetted or restrained nearly every attempt to transform the city s school system then asks whether schools might be better reformed by others To show why city schools have failed urban children so badly she traces Chicago s reform history over four political eras revealing how corporate power was instrumental in designing and revamping the system Her narrative encompasses the formative era of 1880 1930 when teachers unions moderated business plans

previously unexplored business activism from 1930 to 1980 when civil rights dominated school reform and the decentralization of the 1980s She also covers the uneasy cooperation among business associations in the 1990s to install the mayor as head of the school system a governing regime now challenged by privatization advocates Business people may be too wedded to a stunted view of educators to forge a productive partnership for change Unionized teachers bridle at the second class status accorded them by managers If reform is to reach deeply into classrooms Shipp's concludes it might well require a new coalition of teachers unions and parents to create a fresh agenda that supersedes corporate interests This study clearly shows that in Chicago as elsewhere urban schooling is intertwined with politics and power By reviewing more than a century of corporate efforts to make education work Shipp's makes a strong case that it's high time to look elsewhere perhaps to educators themselves for new leadership

Rediscovering the Democratic Purposes of Education Lorraine McDonnell, P. Michael Timpane, Roger W. Benjamin, 2000

Why do America's public schools seem unable to meet today's social challenges As competing interest groups vie over issues like funding and curricula we seem to have lost sight of the democratic purposes originally intended for public education Public schools were envisioned by the Founders as democratically run institutions for instilling civic values but today's education system seems more concerned with producing good employees than good citizens Meanwhile our country's diversity has eroded consensus about citizenship and the professionalization of educators has diminished public involvement in schools This volume seeks to demonstrate that the democratic purposes of education are not outmoded ideas but can continue to be driving forces in public education Nine original articles by some of today's leading education theorists cut a broad swath across the political spectrum to examine how those democratic purposes might be redefined and revived It both establishes the intellectual foundation for revitalizing American schools and offers concrete ideas for how the educational process can be made more democratic The authors make a case for better empirical research about the politics of education in order to both reconnect schools to their communities and help educators instill citizenship An initial series of articles reexamines the original premise of American education as articulated by important thinkers like Jefferson and Dewey A second group identifies flaws in how schools are currently governed and offers models for change A final section analyzes the value conflicts posed by the twin strands of democratic socialization and governance and their implications for education policy Spanning philosophy history sociology and political science this book brings together the best current thinking about the specifics of education policy vouchers charter schools national testing and about the role of deliberation in a democracy It offers a cogent alternative to the exchange paradigm and shows how much more needs to be understood about an issue so vital to America's future
