Political Parties and Elections in the French Fifth Republic J. R. Frears, 1977 Political Parties and Elections in the French Fifth Republic J. R. Frears, 1977 **Contemporary French Political Parties** David Scott Bell, 1982 French Political Parties Under the Fifth Republic Frank Lee Wilson, 1982 *The Government of the Fifth Republic* J. A. Laponce, 1961 *Political Parties and Democracy* Kay Lawson, 2010-07-20

Native scholars explore the relationship between political parties and democracy in regions around the world The development of political parties over the past century is the story of three stages in the pursuit of power liberation democratization and de democratization Political Parties and Democracy is comprised of five stand alone volumes that probe the realities of political parties at all three stages In each volume contributors explore the relationship between political parties and democracy or democratization in their nations providing necessary historical socioeconomic and institutional context as well as the details of contemporary political tensions Contributors are distinguished indigenous scholars who have lived the truths they tell and are thus able to write with unique breadth depth and scope They show the parties of their respective nations as they have developed through history and changing institutional structures and they explain the balance of power among them and between them and competing agencies of power today The Presidentialization of Politics Thomas Poguntke, Paul Webb, 2007-04-27

The Presidentialization of Politics shows that the politics of democratic societies is moving towards a presidentialized working mode even in the absence of formal institutional changes These developments can be explained by a combination of long term structural changes in modern politics and societies contingent factors which fluctuate over time While these contingent short term factors relate to the personalities of office holders the overall political agenda and the majority situation in parliament there are several structural factors which are relatively uniform across modern nations First the internationalization of modern politics which is particularly pronounced within the European Union has led to an executive bias of the political process which has strengthened the role of political top elites vis vis their parliamentary groups and or their parties Their predominance has been amplified further by the vastly expanded steering capacities of state machineries which have severely reduced the scope of effective parliamentary control At the same time the declining stability of political alignments has increased the proportion of citizens whose voting decisions are not constrained by long standing party loyalties In conjunction with the mediatization of politics this has increased the capacity of political leaders to by pass their party machines and to appeal directly to voters As a result three interrelated processes have led to a political process increasingly moulded by the inherent logic of presidentialism increasing leadership power and autonomy within the political executive increasing leadership power and autonomy within political parties and increasingly leadership centred electoral processes The book presents evidence for this process of presidentialization for 14 modern democracies including the US and Canada While there are substantial cross national differences the overall thesis holds modern democracies are increasingly

following a presidential logic of governance through which leadership is becoming more central and more powerful but also increasingly dependent on successful immediate appeal to the mass public Implications for democratic theory are considered

Fascism, Populism and the French Fifth Republic Catherine Fieschi,2004-09-04 How can a nation associated with the Declaration of the Rights of Man serve as the context for a successful populist party of the far right This book explains how since the late 1950s French institutions have provided the Front National with ways in which to permeate national politics

Political Parties in the European Community Stanley Henig,2025-09-12 Political Parties in the European Community 1979 looks at the decision by the member governments of the European Community to proceed to the direct election of a European Parliament It provides a full survey of the parties of the nine EC states giving both information and analysis on political and electoral systems party systems philosophy and structure of major parties finances membership and organisation In addition it deals with the evolution of transnational groupings of parties both inside and outside the European Parliament and the concluding chapter places Europe s parties in the overall context of the political societies within which they operate

Baumgartner, 2000-06-30

Presidential campaigns have seen revolutionary changes in the past few decades in the United States and elsewhere These changes include rapid advances in communications technology and marketing and survey methodology an increased involvement of non party groups and campaign professionals in electoral politics a decreased role for political parties in the recruitment screening and nominating of candidates and dramatic changes in campaign finance laws While changes in presidential campaigning have not gone unnoticed analysis of these changes is typically included in general works on presidential campaigns and elections or studied individually Baumgartner clarifies what is meant by candidate centered as it applies to the organization and operation of presidential campaigns and elections He demonstrates that campaign organizations have become increasingly more central to the campaign effort than party organizations throughout the process of presidential selection and he shows that what is happening to electioneering practices in the United States is also happening although still to a lesser extent in France and Russia The French Polity William Safran, 1985 Political Parties of Europe: Albania-Norway Vincent E.
