## Political System Matters:

*The Political System Matters* Donald Granberg, Sören Holmberg, 1988-10-27 Originally published in 1988 this book asks the question how does the political system affect the behaviour of individuals Donald Granberg and Sören Holmberg use long term cross sectional and panel national surveys of electorates in two very different democratic systems Sweden and the United States to examine an issue that has implications for our understanding of both social and psychological processes and also political systems in general Their interdisciplinary and comparative survey considers such topics as ideological perception of abstract and concrete issues at the party and individual level the polarisation interrelation and transitivity of attitudes the relationship between intention and behaviour and the ways in which behaviour may be predicted The book offers a detailed and convincing analysis of the interaction of political context with social psychological processes It will be of interest not only to social political and comparative psychologists but also to all researchers with an interest in electoral behaviour
