There have been many books on the origin of astronomy some good and some very poorly address the issues of ancient mans
interests in the stars The ancient Sumer and Egyptian notions of music mostly confirms how ancient this notion is in their
chorded progressions of tone This notion is more an Upper Paleolithic celestial idea In a sense man during this time man was
beginning to have a concept of north south east and west in spatial terms It involves the curvature of the ribs of Nut the
Egyptian Sky Goddess as a ribbed vaulted sky and sometimes in a horizon sense of a bowing arch of a stars path or the curve
of a bone in the stars moving path The half way point of this fall for say our Nut Adam and Eve would thus be about 27 000
BC which falls in a significant period Ice Age re emergence and a deserts expanding in equator regions These are only a
small part of what had to addressed in origins of night sky studies The point being this piece as fake or not is that the
components of the animals man plants and mans artifacts were very early on displayed We might ask in such a condition
what was their night sky If we look at all of these constellations they fall below the Celestial Equator in the South Pole region
mostly It would seem that all these birds to them being placed in the night sky like the stars and as they watched what
directions the birds along with stars as to where they went in order to ascertain their relations to dusk or dawn night sky
What caused the South Africa plight of 80 000 BC The Antarctica had been growing ice forms from 170 000 BC to 80 000 BC
towards the north and then around 70 000 BC there seemed to be a melting trend back south In an astronomy sense we can
thank him for larger game entering in the pantheon of the constellations or the leaf otter and some constellations lost to time
like the mammoths What does this have to do with constellations taboos or the advent of Cro Magnon man well in the
depictions of constellation images Slowly from east to west the stars move but then it did not take man not long after 70 000

BC to note that some planets or stars seemed to move retrograde in the night sky This book address what ideas did they show or have before or after these earth changes As ideas such as Maybe it was a lasso constellation for some animals capture as a God of Capture And Somewhere around the time of 50 000 BC in the region of northern England to the region above the Black Sea there occurred a melting phase between the ice ages and cultures began to spread The evidence of this is found by different locations in Europe and Central Europe of the use of rock shadows stars noted by hands in movement and certain hand symbols by star images or dots as stars not just stab marks Ironical again that Man beside Woman on the pole treetop does not have strong reminders of the Adam Eve Tree and the Serpent as maybe Draco The symbol anciently always shows the snake at the foot of the tree or ascended the tree at the apex of the trunk which if astronomy wise would mean an ascended constellation to the Zenith or the Pole Draco thus deposed Adam and Eve from their own constellation garden and domain by it ascending as an ancient Pole Axis Mundi Thus the smoke screen really is a tied between this local area of France and Late Paleolithic Mans ideas of that region in the night sky of a certain year or month period of hunting Although we have jumped forward in the time of ancient astronomy beginnings in a way really in this sense we have not To the real beginnings of little known ancient astronomy **Proceedings of the Institute on Library Work with Children** University of California, Berkeley.
