Rise And Fall Of The Labour Left:

The Socialist Ideas of the British Left's Alternative Economic Strategy Baris Tufekci, 2019-11-30 This book provides the first book length study of the political and economic ideas of the British left's Alternative Economic Strategy in the 1970s and early 1980s. Discussing the AES's approaches to capitalism, the nation state and the working class, it argues that existing academic accounts have significantly overstated the radicalism of the strategy. Perhaps more notable, especially in the light of its stated revolutionary aims, was the extent of its moderation, its continuities with post-war Labour revisionism, its marked reluctance to look beyond the market economy, the degree of its preoccupation with Britain's global economic status and its inability to break with Labourist politics of class co-operation in the national interest. While the book argues that the AES was the last class politics socialist initiative in mainstream British politics, it also explores the ways in which its ideas perhaps prepared the way for New Labour in the 1990s and its relationship with Corbynism since 2015. **The Rise and Fall of the Labour Left** Patrick Seyd, 1987

Labour History, 2006 Two Decades in British Politics Bill Jones, Lynton J. Robins, 1992 Celebrates the 21st anniversary of The Politics Association and offers a reassessment of the continuities and changes in the governments led by Wilson, Heath, Callaghan and Thatcher. The book asks whether 1979 was a political watershed or an undistinguished step in Britain's economic decline. **The Longman Handbook of Modern British History, 1714-1995** Chris Cook, John Stevenson, 1996 A thoroughly revised and updated edition of this comprehensive text.

The Longman Companion to Britain Since 1945 Chris Cook, John Stevenson, 1996 This text provides essential facts and commentary on all aspects: political, diplomatic, military, social, economic, environmental and religious of Britain since 1945. The book looks at local government and at Britain's place in the wider world as well as successive national administrations.

The Rise and Fall of Venice Philip Longworth, 1974 **Whitaker's Books in Print**, 1998 **Book Review Digest**, 1989 Excerpts from and citations to reviews of more than 8 000 books each year drawn from coverage of 109 publications. Book Review Digest provides citations to and excerpts of reviews of current juvenile and adult fiction and nonfiction in the English language. Reviews of the following types of books are excluded: government publications, textbooks and technical books in the sciences and law. Reviews of books on science for the general reader, however, are included. The reviews originate in a group of selected periodicals in the humanities, social sciences and general science published in the United States, Canada and Great Britain. Publisher **Talking Politics**, 1988 **Fightback!** Dianne Hayter, 2005 This book tells the story of how the moderate right in the Labour Party, trumped by the left for a decade and weakened by defections to the SDP in 1981, fought back organisationally to regain control of the party by 1985, producing an NEC supportive of Neil Kinnock and ready to expel Militant, introduce One Member One Vote and return the party to electability. It describes the Manifesto Group of Labour MPs, Labour Solidarity Forward Labour and the all-important but secret St Ermins Group of senior trade unionists, each of which strove to ensure that the party represented Labour voters and trade union members. Written by an insider, it

draws on extensive interviews with all the key players and unique access to private papers and closed archives to explain how the moderates triumphed over the hard left *Technology and the Decline in Demand for Unskilled Labour* Mark Sanders, 2005-01-01 The position of low skilled workers in the labor market has deteriorated significantly over the past three decades What has caused this deterioration in low skilled labor demand and what can explain the different labor market responses throughout the OECD Mark Sanders addresses these questions and evaluates proposed policies to improve upon the present situation and prevent further deterioration in the future The author develops a theoretical framework that produces two hypotheses to explain the shift in relative demand as well as the different ways in which this shift has manifested itself The framework is then extended by introducing unemployment and additional hypotheses are proposed to explain the main EU US differences The dynamics thus uncovered yield somewhat unorthodox policy implications on income labor market and technology policies in Europe and the US This comprehensive book will appeal to both scholars and academics while graduate and PhD students looking for an accessible introduction to modeling the dynamics of technical change and its interactions with the labor market will find it of great interest **New Politics** ,1988 The Macroeconomics of Open Economies Under Labour Mobility George M Agiomirgianakis, 2019-05-29 First published in 1999 this study recognises the importance of international labour mobility for modern economics This is in large part due to its effects on the size age structure and skills of the labour force the human flow between countries and the expected rise in scale as a result of income differentials demographic pressures and differential labour force growth rates along with developments in transport and communications These migrations are increasingly volatile and unpredictable whilst being concentrated in regions like Australia the USA Sub Saharan Africa and Western Europe Given the extensive literature on the microeconomic view George M Agiomirgianakis aims to extend the debate on open economy macroeconomics through an exploration of international labour mobilities and their effects on open economies with flexible exchange rates Ken Andrew Hosken, 2008 After taking control of the GLC through an audacious internal coup in 1981 Ken Livingstone s career was transformed in 2000 when he became the first directly elected Mayor of London as an independent in the teeth of a fierce campaign by Tony Blair and Alastair Campbell This biography provides an account of his life and career Fabian News ,1989 Hugh Gaitskell Brian Brivati, 1996 This biography which explores Gaitskell the man as well as the politician draws on new material from Cabinet papers interviews by the author memoirs and new secondary works published in the last decade **The Labour Party** Tony Cliff, Donny Gluckstein, 1988 A complete history of the Labour Party from its birth in the shadows of the Russian Revolution and the 1926 General Strike through the governments of Attlee Wilson and Callaghan A brilliantly researched new chapter traces the growth of Tony Blair s New Labour in great detail *Wages and Hours of Labour ...* Great Britain. Board of Trade, 1897 *New Society* ,1987
