Rise Of Modern China:

The Rise of Modern China Immanuel Chung-Yueh Hsü, 1983 The third edition of this outstanding textbook vividly describes China's extraordinary metamorphosis from a traditional self-sufficient empire into a modern nation. Professor Hsü surveys the main currents of modern Chinese history from 1600 to the present, focusing throughout on the forces that shaped China's political, diplomatic, intellectual, social, and economic history. Completely revised and up to date, the text now devotes considerable coverage to the period from 1949 to 1981 and includes an entirely new section on China since the death of Mao.

Bernard Shaw's Bridges to Chinese Culture Kay Li, 2016-11-10 This book explores the cultural bridges connecting George Bernard Shaw and his contemporaries such as Charles Dickens and Arthur Miller to China. Analyzing readings, adaptations, and connections of Shaw in China through the lens of Chinese culture, Li details the negotiations between the focused and culturally specific standpoints of eastern and western culture while also investigating the simultaneously diffused, multi-focal, and comprehensive perspectives that create strategic moments that favor cross-cultural readings. With sources ranging from Shaw's connections with his contemporaries in China to contemporary Chinese films and interpretations of Shaw in the digital space, Li relates the global impact of not only what Chinese lenses can reveal about Shaw's world but how intercultural and interdisciplinary readings can shed new light on familiar and obscure works alike.

Kevin Macdonald's Metaphysical Failure: a Philosophical, Historical, and Moral Critique of Evolutionary Psychology, Sociobiology, and Identity Politics Jonas E. Alexis, 2022-04-25 In Kevin MacDonald's *Metaphysical Failure*, Jonas E. Alexis offers a thoroughly researched, nuanced, and lucid analysis of Kevin MacDonald's thought in particular. MacDonald's belief in biological and philosophical Darwinism. It is an important book that fills a critical gap in the literature on the history of revolutionary movements and Darwinism both in the West and in Asia. It is also a study that adds many significant strands to the densely interwoven history of ideas such as Malthusianism and Eugenics. Alexis's book engages debates in the history of ideas going back to Madison Grant and beyond and the history of Darwinism. It challenges many of the life-long prevailing assumptions about identity politics and produces a powerful critique of how scientific theories have been misused to uphold misguided and faulty categorizations. Powerfully reasoned and backed with a startling array of documented studies, Kevin MacDonald's *Metaphysical Failure* presents an in-depth look at key beliefs behind many mistaken and consequently destructive actions taken by numerous writers and thinkers, particularly Darwin's ardent enthusiasts and devoted disciples. The book presents eye-opening insights into the historical development of Darwin's ideological project and how that project ended up crippling Darwin's intellectual children from Richard Dawkins, Francis Crick, James Watson, Daniel Dennett, Ernst Mayr, and E. O. Wilson to Kevin MacDonald, Richard Spencer, David Duke, and Jared Taylor. **The Three Faces of Chinese Power** David M. The Politics and Philosophy of Chinese Power R. James Ferguson, Rosita Dellios, 2016-12-12 This book provides a timely analysis of the politics philosophy and history of Chinese power focusing on social strategic and diplomatic trends that have shaped China for over three thousand years Chinese elites have used the past to inform the present but have also mobilized new ideas to address the country's rapid transition to global power China's intellectual world can draw on a surprisingly pluralist legacy When Chinese thinkers assess power they bring to bear their classical legacy the military classics Chinese socialism and Western political thought There are also a number of intriguing formulations that give shape to the exercise of Chinese power Among these are comprehensive national strength stability preservation soft power asymmetric conflict and counter intervention strategies This book looks at key periods in Chinese history when attitudes to power evolved and at their current expressions These include China's expanded use of think tanks to chart the future efforts at creating an eco civilization to balance growth and an extended set of security and information capabilities From observing the centrality of power in today's international affairs the book moves to the foundational concepts of Chinese governance its belief in a strategic configuration of power as understood in military contexts as well as its growing diplomatic and maritime engagement abroad This analysis culminates in new ideas of functional multipolarity Power is also deployed internally China's use of nationalism as a major tool for state building and cohesion the ongoing role of socialism and the People's Liberation Army are all examined in this light China's current strategic culture has shaped President Xi Jinping's search for a new model of power for China in the twenty first century an endeavor that will have serious implications for the future global order This book provides an alternative perspective on China's trajectory towards a revised international system Importing the European Army David B. Ralston, 1996-06 In a study that extends well beyond military history David B Ralston documents the ways in which five different countries Russia the Ottoman Empire Egypt China and Japan refashioned their armed forces along European lines during the three centuries after 1600 The appropriation of Western military institutions in countries outside of Europe was Ralston argues the major force driving these countries to adopt European administrative economic and cultural modes Following the same format in his discussion of each country Ralston makes this central theme in world history easily accessible to students while offering scholars a sophisticated understanding of the exact nature of the changes brought about by Europeanizing military reforms David B Ralston associate professor of history at the Massachusetts

investigates Taiwan's international role, political development and rapid economic growth. The volume closes with a chapter devoted to the implications of the Taiwan experience and political economy paradigms. Eight figures and thirty-five tables illustrate facets of Taiwan's development, including government structure, indicators of agricultural development, industrialization, educational progress, and export performance, among others. Because of the detailed presentations of political economy theories and their variants, especially in relation to economic and political development in Taiwan, this volume would be an excellent choice for courses in political economy, developing societies, Asian politics, and international relations theory, as well as libraries serving students in these areas.

The Collins History of the World in the Twentieth Century John Ashley Soames Grenville, 1994. The 20th century is the century of communism and fascism, of debt and prosperity of the United Nations and nationalistic fervour of mass demonstrations and individual defiance, and also of the aircraft and the submarine, of the conveyor belt and the computer, of miracle cures and new diseases, and of radio and television.
