**Chemicals in the Environment** R M Harrison, R E Hester, 2007-10-31 Rising concern in recent years over the possible adverse environmental consequences of the use of chemicals has led to a steady increase in national activity towards greater regulation as well as voluntary agreements with manufacturers for risk management of certain products This book begins by reviewing the current framework of legislation for the regulation of chemicals in the UK and then reports expert views on both the current situation and possible future developments Subsequent chapters consider some of the scientific and technical issues including the evaluation of the risks which chemicals can pose to human life and the environment and the problems relating to evaluating the risks associated with metals in the environment Finally the

predictive methods used to model the behaviour of organic chemicals within the environment are described Highly topical and with authoritative contributions from international experts this book covers both the scientific underpinning and the legislative and practical issues of this emotive subject The detailed coverage of a topic that affects many sectors of industry and society will make it popular with a wide audience of individuals from government organisations industry or academic research particularly those in environmental chemistry sectors

**Toxicology and Risk Assessment** Anna M. Fan, George Alexeeff, Elaine Khan, 2015-03-04 The presence of chemicals in our environment is a subject of intense interest owing to the many potential adverse health effects to humans following exposure to these chemicals The principles and practices of risk assessment are used to assess the associated health risks to provide a scientific and health basis for guidance or regulatory standards

**Risk Management of Chemicals** Mervyn Richardson, Royal Society of Chemistry (Great Britain), 1992 This book is an authoritative work on the risk management of chemicals and fills an important gap in the market which is devoid of works on the subject It reviews the current status of risks entailed in the manufacture handling use and disposal of the chemicals on which we all depend and suggests future action for the protection of both the workplace and the natural environment Risk Management of Chemicals has an international authorship and addresses international issues It is the sequel to the RSC's publications Toxic Hazard Assessment of Chemicals and Risk Assessment of Chemicals in the Environment and like those should find an important place as a key reference work This book is a must for graduates researchers regulatory bodies safety professionals trade unions politicians and anyone with an interest in this area
