Innovations in Communication Theories Yanru Chen, 2021-03-01 This book offers a novel approach to innovations in theories of communication and social development It proposes that the man is the message It argues that communication is woven into the fabric of people's daily lives and a scholar with a keen eye an open heart and an inquiring mind should be able to capture the ubiquitous phenomena of communication and turn them into theoretical observations and even innovations Although most of the propositions in this book cannot be tested empirically at least for now owing to the limitations inherent in current research methods they complement the empirical studies of communication based on measurement With due understanding that Western social sciences including communication studies focus on analytical thinking and the fine division of disciplines this book takes a more synthetic approach to analyzing communication often integrating and contextualizing its various factors and channels and categories in analysis and writing Providing a holistic picture of communication that features the crux of the matter how to reach and capture the heart and soul of people without any attempt to manipulate their minds it is more humanistic than many other books on communication studies Although much of the thinking in the book is seemingly Chinese it nevertheless has a universal appeal
