The Rise and Fall of Project Camelot Irving Louis Horowitz, 1967 **Cult of the Irrelevant** Michael C.

Desch, 2021-09-28 How professionalization and scholarly rigor made social scientists increasingly irrelevant to US national security policy To mobilize America's intellectual resources to meet the security challenges of the post 9/11 world US Secretary of Defense Robert M Gates observed that we must again embrace eggheads and ideas But the gap between national security policymakers and international relations scholars has become a chasm In *Cult of the Irrelevant* Michael Desch traces the history of the relationship between the Beltway and the Ivory Tower from World War I to the present day Recounting key Golden Age academic strategists such as Thomas Schelling and Walt Rostow Desch's narrative shows that social science research became most oriented toward practical problem solving during times of war and that scholars returned to less relevant work during peacetime Social science disciplines like political science rewarded work that was methodologically sophisticated over scholarship that engaged with the messy realities of national security policy and academic culture increasingly turned away from the job of solving real world problems In the name of scientific objectivity academics today frequently engage only in basic research that they hope will somehow trickle down to policymakers Drawing on the lessons of this history as well as a unique survey of current and former national security policymakers Desch offers concrete recommendations for scholars who want to shape government work The result is a rich intellectual history and an essential wake up call to a field that has lost its way *The Tender Soldier* Vanessa M. Gezari, 2013-08-13 A sharp eyed look at the complexities of war *Parade* that explores the inner workings of the Human Terrain System a Pentagon program that sends civilian social scientists into war zones to help soldiers understand local culture On the day Barack Obama was elected president in November 2008 a small group of American civilians took their optimism and experience to a village west of Kandahar Afghanistan They were part of the Pentagon's controversial attempt to bring social science to the battlefield driven by the notion that you can't win a war if you don't understand the enemy and his culture The field team in Afghanistan that day included an intrepid Texas blonde a former bodyguard for Afghan president Hamid Karzai and an ex military intelligence

sergeant who had come to Afghanistan to make peace with his troubled past But not all goes as planned In this tale of moral suspense journalist Vanessa Gezari follows these three idealists from the hope that brought them to Afghanistan through the events of the fateful day when one is gravely wounded an Afghan is dead and a proponent of cross cultural engagement is charged with his murder Through it all these brave Americans ended up showing the world just how determined they were to get things right how hard it was to really understand a place like Afghanistan where storytelling has been a major tool of survival and why all future wars will involve this strange mix of fighting and listening Vanessa Gezari is the only journalist to have gained access to the lives of people inside this troubled Army program including the brilliant ambitious figures who conceived it This true story of war and sacrifice will upend your ideas about what really went wrong in Afghanistan *The Rise and Fall of Project Camelot* Irwing Louis Horowitz,1985 *The Rise and Fall of Project Camelot; Studies in the Relationship Between Social Science and Practical Politics.
