Shades Of Dracula Uncollected Stories Of Bram Stoker:

Shades of Dracula Bram Stoker, 1982 **Bram Stoker's Dracula** Carol Margaret Davison, Paul Simpson-Housley, 1997-11 A collection of essays by some of the world's leading scholars analyzing and celebrating the novel's legacy in popular culture *Science and Social Science in Bram Stoker's Fiction* Carol A. Senf, 2002-10-30 Best known today as the author of *Dracula* Bram Stoker also wrote several other works including *The Jewel of Seven Stars* *Lady Athlyne* and *The Lair of the White Worm* In his exploration of supernatural subjects such as vampirism he is clearly a Gothic writer The fantastic elements of his novels seem very much at odds with the world of science Stoker nonetheless draws upon a large body of scientific theory and technological innovation throughout his writings This book studies his blending of Gothic subjects with emerging discoveries in science and technology The volume begins with an overview of Stoker's familiarity with scientific and technical developments It then examines the role of science and technology in his various works which demonstrate his familiarity with civil engineering anthropology physics chemistry and archaeology While many of his writings seem to offer a rather uncritical celebration of science and its applications some works such as *The Jewel of Seven Stars* reveal what happens when science oversteps its bounds Stoker emerges as an early writer of science fiction whose work thoughtfully considers the place of science in society **The Essence and the Margin** Laura Rorato, Anna Saunders, 2009 With the expansion of the EU and calls for a European constitution the question of a common European identity has become increasingly pressing in recent times However in the face of diverse national and regional traditions and the absence of an obvious European cultural imaginary the forging of a strong sense of European identity proves problematic This volume brings together case studies of national and regional images from across Europe which together suggest emerging patterns of identification within contemporary Europe patterns which may not necessarily amount to a European identity but rather to a European mode of identification The chronological structure of the volume demonstrates the increasingly problematic nature of national collective memories and past imaginaries in light of emergent marginal voices and images and suggests that it is both from beyond and within the national paradigm that new challenges are now reshaping the cultural imaginary of European communities Focusing on cultural images within film literature national narratives and myths museum exhibitions and architecture this volume is of interest to a wide variety of disciplines in the humanities and presents an interdisciplinary approach to questions of cultural memory and identity formation **Shades of dracula: uncollected stories/ edited by Peter haining** Bram Stoker, 1982 **Vampires, Mummies, and Liberals** David Glover, 1996 Glover's efforts reveal a writer who was more wide ranging and politically engaged than his current reputation suggests An Irish Protestant and nationalist Stoker nonetheless drew his political inspiration from English liberalism at a time of impending crisis and the tradition's contradictions and uncertainties haunt his work At the heart of Stoker's writing Glover exposes a preoccupation with those sciences and pseudosciences from physiognomy and phrenology to eugenics and
