Shakespeare Cervantes Code:

The Shakespeare-Cervantes Code David Yuhas, 2004 *Power and Imagination* Leonidas Donskis, 2008 Classical and modern literature often reveal more about the organized world's forms of power and authority structures than do works of political philosophy. What are the origins of political consciousness? How does our understanding of political power and its exercise originate in literature? Why do the early manifestations of political and religious tolerance appear in utopian literature rather than in philosophical treatises? Is it possible to do fictionally what others tend to do academically and theoretically? Exploring these questions allows Leonidas Donskis to analyze the relationship between power and imagination, politics and literature, and the principles of reality and imagination.

Shakespeare's Literary Lives Paul Franssen, 2016-01-21 This is an entertaining account of Shakespeare's afterlives in fiction. Paul Franssen offers the first sustained analysis of stories and films that involve the character of Shakespeare. Taking a broad international and historical perspective, he shows how fictions about Shakespeare help us understand what he meant to a certain age, nation, or author, and how they have become a vital aspect of the Shakespeare industry. Appearing sometimes as a ghost or time traveller, fictional Shakespeares have been made to speak to many issues such as the French Revolution, the Irish conflict, colonialism, the Anglo-American relationship, sexual orientation, race, and class. Written in an accessible style, this book will appeal to advanced students as well as academic researchers in Shakespeare studies, film and cultural studies, literary reception, and creative writing.

Theater-Bewusstsein Wojciech Dudzik, 2011 **Hermeneutics and the Problem of Translating Traditional Arabic Texts** Alsayed M. Aly Ismail, 2017-08-21 This book focuses on the problematic issues arising when translating and interpreting classical Arabic texts, which represent a challenging business for many scholars, especially with regards to religious texts. Additionally, the reception of these interpretations and translations not only informs the perception of Muslims and their awareness of the outside world, but also impacts the vision and perception of non-Muslims of Islam and the Muslim world. Consequently, this book reconsiders the concepts of understanding and interpretation and their nexus in the mechanism of translation and proposes a novel hermeneutic method of translating, interpreting, and understanding traditional and classical Arab texts. Handling the issues of understanding from a hermeneutical perspective is shown here to remove the possibility of translation and interpretation rendering a distorted translated text. Drawing on the powerful interpretive theories of Hans Georg Gadamer and Martin Heidegger, the hermeneutic method of translation starts

from a premise that the meaning of a classical text cannot be deduced solely by linguistic analysis of its words but requires in depth investigation of the invisible contextual elements that control and shape its meaning Traditional texts are seen in this model as travelling texts whose meaning is transformed across time and space The hermeneutic method of translation allows the translator to identify those elements from the real world that informed a classical text at the time of its writing so that it can be adapted and made relevant to its contemporary context Traditional texts can enlighten our minds and cultivate our souls religious texts can elevate our behavior and thinking and help refine our confused contemporary lives When texts become isolated from their world they lose this lofty goal of enlightenment and elevation **Die Zeitung** J.
