Filming Shakespeare's Plays Anthony Davies, 1990-06-29 Shakespeare s plays provide wonderfully challenging material for the film maker While acknowledging that dramatic experiences for theatre and cinema audiences are significantly different this book reveals some of the special qualities of cinema s dramatic language in the film adaptations of Shakespeare s plays by four directors Laurence Olivier Orson Welles Peter Brook and Akira Kurosawa each of whom has a distinctly different approach to a film representation Davies begins his study with a comparison of theatrical and cinematic space showing that the dramatic resources of cinema are essentially spatial The central chapters focus on Laurence Olivier s Henry V Hamlet and Richard III Orson Welles Macbeth Othello and Chimes at Midnight Peter Brook s King Lear and Akira Kurosawa s Throne of Blood Davies discusses the dramatic problems posed by the source plays for these films for the film maker and he examines how these films influenced later theatrical stagings He concludes with an examination of the demands that distinguish the work of the Shakespearean stage actor from that of his counterpart in film

The Relationship between Performance Space and Production of Shakespeare's Roman Plays Philipp Reul,2007-05-10 Examination Thesis from the year 2006 in the subject English Language and Literature Studies Literature grade 2.0 University of Cologne Englisches Seminar language English abstract Peter Brook s1 beginning of the Empty Space assumes that a theatre performance consists of three very basic components According to Brook performances are dependent on a space in which spectator and actor come together and agree on a place which they call stage It is in this real space that actors and audience imagine a fictional world Brook s quotation beautifully encapsulates the simplicity of any theatre performance while it oversimplifies the complicated processes of bringing a play to life in the same breath The empty space which Brook defines in his work is not realistic It rather symbolizes his personal need to liberate his artistic talent from the fixed and institutionalized British theatre venues of the 1960 s In fact for the majority of modern theatre performances it is the theatre building which provides the space for all three basic parts Although it is true that no more than an empty space is needed for staging a play during the last centuries the majority of performances have been sheltered by purpose built theatres Most theatres provide a stage in the form of a proscenium stage thrust stage or stage in the round How a spectator looks at the actors performing on this stage differs depending on the characteristics of each theatre venue A space in the theatre may it be empty or filled connects the two most important parts of any theatrical event the audience and the actors Space in the theatre is therefore crucial for every performance The Elizabethan times mark the most influential period for modern theatre Closely intertwined with the world s most famous playwright William Shakespeare it is in this time that the first modern theatres were erected Therefore Shakespeare s times and works are always closely connected with practices of today s theatre The aim of this study is to research the relationship between the performance space of specific theatres and production of Shakespeare s Roman plays in Great Britain in 2006 It will be discovered to what extent performance space can influence production of Shakespeare s Roman plays Likewise it will be examined how different productions make use of performance space The question of which performance space works best for staging Shakespeare s Roman plays in 2006
