Radar Techniques Using Array Antennas:

Radar Techniques Using Array Antennas Wulf-Dieter Wirth, 2001 Annotation This book gives an introduction to the possibilities of radar technology based on active array antennas giving examples of modern practical systems many of which were developed in Europe In addition to coverage of antennas beam forming sampling and detection of signals and array signal processing several modern systems are described including space time adaptive processing STAP moving target detection using synthetic aperture radar SAR and several other experimental phased array radar systems There are many valuable lessons presented for designers of future high standard multifunction radar systems for military and civil applications The book will appeal to graduate level engineers researchers and managers in the field of radar aviation and space technology

Radar Array Processing Simon Haykin, John Litva, Terence J. Shepherd, 2013-03-08 Radar Array Processing presents modern techniques and methods for processing radar signals received by an array of antenna elements With the recent rapid growth of the technology of hardware for digital signal processing it is now possible to apply this to radar signals and thus to enlist the full power of sophisticated computational algorithms Topics covered in detail here include super resolution methods of array signal processing as applied to radar adaptive beam forming for radar and radar imaging This book will be of interest to researchers and students in the radar community and also in related fields such as sonar
