Practical Neuroophthalmology Timothy J. Martin, James Corbett, 2013-07-06. AN ENGAGING CLINICALLY ORIENTED TEXT THAT SPANS THE FULL SPECTRUM OF NEUROOPHTHALMOLOGY. Practical Neuroophthalmology covers the basic principles and major conditions of neuroophthalmology in a concise user friendly manner. Rather than merely presenting a catalog of facts, the authors enrich the text by describing how complex neuroophthalmic signs and symptoms are often a logical consequence of anatomy and pathophysiology. With its comprehensive coverage and neuroanatomic approach, Practical Neuroophthalmology is both an outstanding clinical resource and a valuable board review tool. Features: Discussion of anatomy in the context of disease states making the consequence of disease more readily understood. Combined illustrations and tables present complex information in an easy to follow manner. Original clinical case studies, optic disc photographs, visual fields, clinical course and other data from an illustrative case are presented together to give you a visual summary of the disease. Photographic surveys of disease manifestations, clinical photographs from different patients with the same disease demonstrate the full spectrum of disease presentation. Tables and boxes devoted to differential diagnosis. Important clinical decision making information is synthesized and reinforced in a convenient outline form. Key points summarized at the end of each chapter. Suggested readings at the end of each chapter.
