Practice Makes Practice A Critical Study Of Learning To Teach:

Practice Makes Practice Deborah P. Britzman, 1991-01-01 Centering on the lived experiences of student teachers this book sends out rays of surprising light towards the enterprise of teacher education today Doing so it transfigures what is often conceived of as a nesting of commonplaces This book will make the life of the educator harder and more tonic it will urge the reader to confront the contradictory and the tension But it will also disclose the unexpected Education will be viewed as if after all it can be otherwise From the Foreword by Maxine Greene Practice Makes Practice explores the contradictory realities of secondary teaching and how these realities are interpreted and acted upon by its central actors student teachers teachers school administrators and university educators Drawing on the traditions of critical theory Practice Makes Practice is distinguished by its ethnographic account of teaching as a struggle for voice and identity amidst a cacophony of past practices lived experiences cultural myths and normative discourses The struggles of particular student teachers and their professional network are richly portrayed in case studies that trace how individual participants come to make sense of learning to teach the problems of pedagogy and structural constraints For those learning to teach this text can provide insight into their own struggles Experienced teachers may gain insight into their own socialization And researchers and teacher educators may reconsider the structure of their work and how the process of socialization can be studied and interpreted

Curriculum Theorizing and Teacher Education Anne M Phelan, 2015-02-11 If teacher education as a field of study is to contribute to the revitalization re moralization and re politicization of Education this book argues that it needs to be alert to questions of teachers intellectual and political freedom and to concerns about the legitimacy of what we do in teacher education in the name of Education Anne Phelan demonstrates how curriculum theorizing can serve such an educational project by engaging concerns about subjectivity human agency and action society and historical moment thereby widening the field of insight in teacher education and informing debates about new trajectories for policy and practice Exploring teacher education through ethical political aesthetic vocabularies drawn from the Humanities is vital at a time when the dehumanizing influences of performativity standardization and accountability are evident in education systems across the world and when we are in danger of losing the things that we most value and are the least measurable relationships independent thought and ethical judgment Curriculum Theorizing and Teacher Education will be of interest to teacher educators who are practicing researching or re designing teacher education as well as policy makers who are curious about new possibilities for framing the problem of teacher education at provincial state and federal levels

The Educator and The Ordinary Elizabeth O'Brien, 2023-08-14 This book creates a unique discursive environment to consider how initial teacher education can support student teachers in practical and personal senses in what they can do and who they are What is it to care To develop our voice To educate in beautifully risky ways Engaging with the philosophy of Stanley Cavell Gert Biesta and Nel Noddings central capabilities of the educator are suggested Acknowledgement Autobiography Imagination

Interruption Attention and Uncertainty culminating in the essential unifying capability of The Ordinary underpinned by Complexity and Hope This book will appeal to those interested and engaged in initial teacher education professional development and support from early years to higher education and practicing educators It aims to enrich theoretical as well as practical discussion to influence how we live how we think and how we treat each other *Making a Difference in Teacher Education Through Self-Study* Clare Kosnik, Clive Beck, Anne R. Freese, Anastasia P. Samaras, 2006-02-14 examples of research conducted on 15 different teacher education programs the impact the research had on the development of the program is included the text systematically describes 15 teacher education programs engaging stories of teacher educators working to renew their programs The studies include a description of the research methodology used *International Handbook of Teacher Education* John Loughran, Mary Lynn Hamilton, 2016-05-04 The International Handbooks of Teacher Education cover major issues in the field through chapters that offer detailed literature reviews designed to help readers to understand the history issues and research developments across those topics most relevant to the field of teacher education from an international perspective This volume is divided into two sections The organisation and structure of teacher education and knowledge and practice of teacher education The first section explores the complexities of teacher education including the critical components of preparing teachers for teaching and various aspects of teaching and teacher education that create tensions and strains The second examines the knowledge and practice of teacher education including the critical components of teachers professional knowledge the pedagogy of teacher education and their interrelationships and delves into what we know and why it matters in teacher education Learning Teaching from Experience Viv Ellis, Janet Orchard, 2014-01-16 What do teachers learn on the job And how if at all do they learn from experience Leading researchers from the UK Europe the USA and Canada offer international research based perspectives on a central problem in policy making and professional practice the role that experience plays in learning to teach in schools Experience is often weakly conceptualized in both policy and research sometimes simply used as a proxy for time in weeks and years spent in a school classroom The conceptualization of experience in a range of educational research traditions lies at the heart of this book exemplified in a variety of empirical and theoretical studies Distinctive perspectives to inform these studies include sociocultural psychology the philosophy of education school effectiveness the sociology of education critical pedagogy activism and action research However no one theoretical perspective can claim privileged insight into what and how teachers learn from experience rather this is a matter for a truly educational investigation one that is both close to practice and seeks to develop theory At a time when policy makers in many countries seek to make teacher education an entirely school based activity Learning Teaching from Experience offers an essential examination of the evidence base the traditions of inquiry and the limits of those inquiries **Teaching** Rick Churchill, Tiffani Apps, Jantiena Batt, Karley Beckman, Peter Grainger, Jessica Holloway, Amanda Keddle, Will Letts, Jennu Mackay, Michelle McGill, Julianne Moss, Michael C.
