## **Practice Of Architecture The Builders Guide:**

*Practice Of Architecture* Asher Benjamin, 1794 Asher Benjamin 1773 1845 published the first American builder's guide and his architectural books played an invaluable role in disseminating the new language of the Greek Revival. When originally published they were remarkably popular and were among the most influential of all Greek Revival handbooks. Throughout the American South, Midwest, and New England, one still comes across houses built in the 1830s, 1840s, and 1850s patterned directly after Benjamin's designs. The two books incorporated here, *Practice of Architecture* 1833 and *The Builders Guide* 1839, are his most accomplished Grecian pattern books. With the growing number of contemporary architects who are designing buildings based on the forms of nineteenth-century Grecian architecture, Benjamin's books should prove an invaluable resource for all lovers of the Greek Revival: builders, owners, preservationists, historians, and architects alike. Thomas Gordon Smith is chairman of the school of Architecture at the University of Notre Dame. His books include *Classical Architecture: Rule and Invention* and a newly illustrated edition of Vitruvius's *Ten Books on Architecture*.
