Practical Utopians American Workers And The Cooperative Movement In The Gilded Age:

The Practical Utopians Steven Bernard Leikin, 2005 An exploration of the ideological conflicts and practical experiences of late nineteenth century American workers who pursued cooperation as an alternative to competitive capitalism Between 1865 and 1890 in the aftermath of the Civil War virtually every important American labor reform organization advocated cooperation over competitive capitalism and several thousand cooperatives opened for business during this era The men and women who built cooperatives were practical reformers and they established businesses to stabilize their work lives families and communities Yet they were also utopians envisioning a world free from conflict where workers would receive the full value of their labor and freely exercise democratic citizenship in the political and economic realms Their visions of cooperation though were riddled with hierarchical notions of race gender and skill that gave little specific guidance for running a cooperative The Practical Utopians closely examines the experiences of working men and women as they built their cooperatives contested the meanings of cooperation and reconciled the realities of the marketplace with their various and often conflicting conceptions of democratic participation Steve Leikin provides new theories and examples of the failure and successes of the cooperative movement including how the Gilded Age s most powerful labor organization the Knights of Labor collapsed in the face of the expanding industrial economy Dealing with a critically important yet largely ignored aspect of working class life during the late nineteenth century The Practical Utopians brings crucial aspects of the cooperative movement to light and is a necessary study for all scholars of history labor history and political science

Unbuilt Utopian Cities 1460 to 1900: Reconstructing their Architecture and Political Philosophy Tessa Morrison,2016-03-09 Bringing together ten utopian works that mark important points in the history and an evolution in social and political philosophies this book not only reflects on the texts and their political philosophy and implications but also their architecture and how that architecture informs the political philosophy or social agenda that the author intended Each of the ten authors expressed their theory through concepts of community and utopian architecture but each featured an architectural solution at the centre of their social and political philosophy as none of the cities were ever built they have remained as utopian literature Some of the works examined are very well known such as Tommaso Campanella s Civitas Solis while others such as Joseph Michael Gandy s Designs for Cottages are relatively obscure However even with the best known works this volume offers new insights by focusing on the architecture of the cities and how that architecture represents the author s political philosophy It reconstructs the cities through a 3 D computer program ArchiCAD using Artlantis to render Plans sections elevations and perspectives are presented for each of the cities The ten cities are Filarete Sforzina Albrecht D rer Fortified Utopia Tommaso Campanella The City of the Sun Johann Valentin Andreae Christianopolis Joseph Michael Gandy An Agricultural Village Robert Owen Villages of Unity and Cooperation James Silk Buckingham Victoria Robert Pemberton Queen Victoria Town King Camp Gillette Metropolis and Bradford Peck The World a Department Store Each chapter considers the work in conjunction with contemporary thought the political philosophy and the reconstruction of the city Although these ten cities represent over 500 years of utopian and political thought they are an interlinked thread that had been drawn from literature of the past and informed by contemporary thought and society The book is structured in two parts
