Education in the Health Professions Clare Delany, Elizabeth Molloy, 2009-09-01 Clinical settings are dynamic educational spaces that present both opportunities and barriers to learning and teaching Designed to inform challenge and educate health professionals about the evidence underpinning clinical education practices and outcomes this multi disciplinary book brings together important concepts in healthcare education and addresses context and processes of learning professional identity and socialisation feedback and assessment ethics and inter professional education The authors encourage teaching and learning practices based on research findings expertise and innovation and the development of individual teaching methods and styles from a theoretical base that provides relevant principles direction and support With clear links between theory research and practice collaboration from a broad range of clinical disciplines and models for learning and teaching grounded in empirical research Clinical Education in the Health Professions will become a standard reference for all health professionals and educators examines patterns of practice in clinical education in the health professions using a qualitative research focus identifies the roles of university and clinical educators students peers and patients in clinical education highlights implicit tensions in clinical education practice and presents strategies to identify and address such tensions challenges the reader to consider new approaches to clinical education that may optimise students learning and enculturation into the health professions *Practice, Learning and Change* Paul Hager, Alison Lee, Ann Reich, 2012-06-25

The three concepts central to this volume practice learning and change have received very different treatments in the educational literature an oversight directly confronted here While learning and change have been extensively theorised their various contexts articulated and analysed practice is notably underrepresented Where much of the literature on learning and

change takes the notion of practice as an unexamined given its co location as a term with various classifiers as in legal practice and teaching practice render it curiously devoid of semantic force In this book practice is the super ordinate organising idea Drawing on what has been termed the practice turn in contemporary theory the work develops a conceptual framework for researching learning in and on practice It challenges received notions of practice questioning the assumptions elisions connotations and silences on the subject In so doing it offers fresh insights into learning and change and how they relate to practice In tandem with this conceptual work the book details site ontological studies of practice and learning in diverse professional and workplace contexts examining the work of occupations as various as doctors chefs and orchestral musicians It demonstrates the value of theorising practice learning and change as well as exploring the connections between them amid our evolving social and institutional structures
