Teacher Education Minh Hue Nguyen, 2019-07-16 This book examines a range of complex issues concerning the professional experience i.e. practicum in English language teacher education with regard to curriculum design and implementation as well as professional learning. Drawing on a sociocultural perspective it explores the context of the professional experience preservice teachers as learners of English language teaching and the activity of learning to teach English language in connection with interrelated contextual and personal issues. Contextual issues such as policies, curricula, university-school partnerships and mentoring relations are investigated in relation to personal issues such as the beliefs, expectations, prior educational experiences, previous teaching experiences and cultural/linguistic backgrounds of preservice teachers. In turn, the book addresses professional learning issues including professional identity development, emotional experiences and pedagogical learning in depth. The book delves into the qualitative, fine-grained aspects of the professional experience while also making valuable conceptual contributions through a sociocultural analysis of the professional learning experience which can also be applied to research in other teacher education contexts. The findings presented here hold practical implications for English language teacher education in terms of developing a knowledge base for English language teaching and an effective model of professional experience to prepare English language teachers for working in today's expanded, diverse and dynamic neoliberal contexts.
