Otto, Nathaniel James Hall, Wendy Irene Baltzer, 2021-09-29 *Creating Online Tutorials* Hannah Gascho Rempel, Maribeth Slebodnik, 2024-02-14 Today's students rely heavily on electronic resources; they expect to be able to access library resources from any location and at any time of the day. Online education is ubiquitous from K-12 through graduate level coursework and is increasingly used in on-the-job training. Libraries must be prepared to guide learners to use library resources when and where they are needed. Thoughtfully designed online tutorials can be the library's answer to providing this point-of-need instruction that learners have come to expect. When librarians don't have the technical expertise needed to create online tutorials, *Creating Online Tutorials: A Practical Guide for Librarians*, Second Edition, will help guide them through the basics of designing and producing an online tutorial. Using practical examples, the book leads librarians through the process of creating an online tutorial from start to finish and provides tips and strategies that will be useful to librarians with more experience in designing online tutorials. This detailed roadmap for designing and producing online tutorials covers: Is a tutorial the right solution? Assessing diverse user needs. Choosing the right technology. Selecting and organizing instructional content. Planning tutorial design elements. Integrating assessment into tutorial design. Maintaining and updating tutorials. Finding online tutorial resources. After reading this book, new tutorial developers will have a practical, adaptable blueprint that enables them to confidently address the creation of their first online tutorials, and experienced developers will learn efficient techniques to create and enhance future tutorials that are attractive, effective teaching tools. Rural and Regional Futures Anthony Hogan, Michelle Young, 2014-09-19 Agriculture, mining and related rural industries have been central to the development of Australia's economy. This book details the role that the Australian Government has played in the making of rural and regional Australia, particularly since World War II. The book reviews these policies and evaluates them with regards to the commitments undertaken by the Government to contribute towards vibrant rural communities. Policy areas addressed include agriculture, water, education, welfare and population, natural resource management, resource extraction, Indigenous affairs, localism, rural research and regional innovation, Youth Affairs and the devolution of regional governance. Overall, two distinct policy strategies can be observed: one wherein the government saw its role as part of the entrepreneurial state and a sector wherein government has increasingly taken itself out of industry development, leaving this role to the market. Having considered these strategies and their impacts, the book concludes that policy over the past 40 years has not in fact contributed to a more vibrant, prosperous rural and regional Australia. *Rural and Regional Futures*

concludes with several chapters looking to the future One chapter explores what the role of the state can be within a social market economy while the final chapter gives consideration to the initial steps rural communities will need to take to begin the process of revitalisation While these materials present as a case study of developments in Australia the policy shift from the Government as entrepreneur to a focus on markets is an international one and as such the insights offered by this book will have wide appeal
