Emerging Technologies and Digital Transformation in the Manufacturing Industry Ortiz-Rodriguez, Fernando, Tiwari, Sanju, Hernández-González, Luis Manuel, Tiburcio, Agustin, 2023-09-07 Emerging Technologies and Digital Transformation in the Manufacturing Industry offers a comprehensive solution to the pressing challenges faced by the manufacturing industry As manufacturers grapple with the need to adapt to changing customer expectations and embrace emerging technologies this book provides a timely and relevant resource Edited by esteemed scholars it features high quality chapters that delve into technology driven approaches such as Internet connected machinery artificial intelligence and sensors with the aim of enhancing efficiency productivity and overall performance in manufacturing processes Covering key topics such as machine learning blockchain technologies big data and the industrial Internet of Things IIoT the book explores transformative concepts like digital twins extended reality and the impact of 5G and edge computing With contributions from authoritative experts this book serves as an indispensable tool for students researchers and IT professionals in manufacturing plants By offering practical guidance and insights Emerging Technologies and Digital Transformation in the Manufacturing Industry equips readers with the knowledge and tools needed to navigate the complexities of digital transformation and seize the opportunities presented by emerging technologies It is academic rigor and practical applicability makes it a valuable resource that is poised to have a significant impact on the manufacturing IT community and academic scholars worldwide enabling a successful journey toward a more efficient and resilient future in the manufacturing industry

The Dynamical Ionosphere Massimo Materassi, Biagio Forte, Anthea J. Coster, Susan Skone, 2019-11-28 The Dynamical Ionosphere A Systems Approach to Ionospheric Irregularity examines the Earth's ionosphere as a dynamical system with signatures of complexity The system is robust in its overall configuration with smooth space time patterns of daily seasonal and Solar Cycle variability but shows a hierarchy of interactions among its sub systems yielding apparent unpredictability space time irregularity and turbulence This interplay leads to the need for constructing realistic models of the average ionosphere incorporating the increasing knowledge and predictability of high variability components and for addressing the difficulty of dealing with the worst cases of ionospheric disturbances all of which are addressed in this interdisciplinary book Borrowing tools and techniques from classical and stochastic dynamics information theory signal processing fluid dynamics and turbulence science The Dynamical Ionosphere presents the state of the art in dealing with irregularity forecasting ionospheric threats and theoretical interpretation of various ionospheric configurations Presents studies addressing Earth's ionosphere as a complex dynamical system including irregularities and radio scintillation ionospheric turbulence nonlinear time series analysis space ionosphere connection and space time structures Utilizes interdisciplinary tools and techniques such as those associated with stochastic dynamics information theory signal processing fluid dynamics and turbulence science Offers new data driven models for different ionospheric variability phenomena
