Precalculus Concepts in Context Judy Flagg Moran, Marsha Jane Davis, Mary E. Murphy, 1996 When these authors found that conventional textbooks just weren't meshing well with the graphing technology they were using in their classes they went to the drawing board Precalculus Concepts in Context takes a fresh look at the content of precalculus and offers students a different approach to learning mathematics It begins with the real world of experience music commerce psychology natural science daily news etc and uncovers the mathematics already present The study of each new topic begins by examining the concept in a context from which the topic naturally arises *Precalculus in Context* Wayne R.
