Predicament Of Culture:

The Predicament of Culture James Clifford, 1988-05-18 The Predicament of Culture is a critical ethnography of the West in its changing relations with other societies Analyzing cultural practices such as anthropology travel writing collecting and museum displays of tribal art James Clifford shows authoritative accounts of other ways of life to be contingent fictions now actively contested in post colonial contexts His critique raises questions of global significance Who has the authority to speak for any group s identity and authenticity What are the essential elements and boundaries of a culture How do self and the other clash in the encounters of ethnography travel and modern interethnic relations In chapters devoted to the history of anthropology Clifford discusses the work of Malinowski Mead Griaule L vi Strauss Turner Geertz and other influential scholars He also explores the affinity of ethnography with avant garde art and writing recovering a subversive self reflexive cultural criticism The surrealists encounters with Paris or New York the work of Georges Bataille and Michel Leiris in the Coll ge de Sociologie and the hybrid constructions of recent tribal artists offer provocative ethnographic examples that challenge familiar notions of difference and identity In an emerging global modernity the exotic is unexpectedly nearby the familiar strangely distanced Das Fremde verstehen - Grundlagen einer kulturanthropologischen Exegese Klaus

Lurie, 2021-12-28 Human beings are a cultural species This predicament enables them to take on many different cultural identities all of which transcend the bounds of natural behavior of other species To contemplate this predicament through philosophy is to reflect on such questions as What makes cultural forms of life possible What is encompassed in them What lies at their core What distinguishes them from natural forms of life What brings them about sustains and causes them to change Philosophical answers to these questions predate abstract ways of thinking as they are sometimes embedded in ancient mythical and religious narratives Such is the story told in the first three chapters of the book of Genesis in the Bible revealing how human beings became the cultural beings that they are This study suggests how that ancient and most celebrated story in the literature of the West may be read as harboring insightful philosophical observations on the cultural nature of human beings It first focuses on the very concept of cultural forms of life revealing its complicated conceptual links to natural forms of life It then offers an interpretive framework for reading mythical symbolic narratives Using these ideas it provides a philosophical reading of the Biblical narrative disclosing it to harbor a metaphysically oriented conception of

nature and two insightful philosophical overviews of the cultural nature of human beings Both overviews endow human beings with an ability to manipulate nature but in different ways the first by subjugating parcels of nature to human will the second by subjugating human beings themselves to a value laden conception of things and ethical forms of life Thus human beings are portrayed as natural creatures possessed of a cultural nature that enables them to transform nature and recreate themselves through their unique cultural predicament *Kultur und Identität* Telse Hartmann,2006 **Decolonizing Social Work** Mel Gray,John Coates,Michael Yellow Bird,Tiani Hetherington,2016-05-13 Riding on the success of Indigenous Social Work Around the World this book provides case studies to further scholarship on decolonization a major analytical and activist paradigm among many of the world s Indigenous Peoples including educators tribal leaders activists scholars politicians and citizens at the grassroots level Decolonization seeks to weaken the effects of colonialism and create opportunities to promote traditional practices in contemporary settings Establishing language and cultural programs honouring land claims teaching Indigenous history science and ways of knowing self esteem programs celebrating ceremonies restoring traditional parenting approaches tribal rites of passage traditional foods and helping and healing using tribal approaches are central to decolonization These insights are brought to the arena of international social work still dominated by western based approaches Decolonization draws attention to the effects of globalization and the universalization of education methods of practice and international development that fail to embrace and recognize local knowledges and methods In this volume Indigenous and non Indigenous social work scholars examine local cultures beliefs values and practices as central to decolonization Supported by a growing interest in spirituality and ecological awareness in international social work they interrogate trends issues and debates in Indigenous social work theory practice methods and education models including a section on Indigenous research approaches The diversity of perspectives decolonizing methodologies and the shared struggle to provide effective professional social work interventions is reflected in the international nature of the subject matter and in the mix of contributors who write from their contexts in different countries and cultures including Australia Canada Cuba Japan Jordan Mexico New Zealand South Africa and the USA *Negotiating History and Culture* Karsten Fitz,2001 Native American cultures have always succeeded to varying degrees in negotiating a balance between their tribal cultural heritage and the dominant culture In the present study the meeting between these cultures is not interpreted as a clash but as a cultural encounter in a contact zone The concept of transculturation serves as a theoretical model to analyze how history and culture are fictionally constructed in contemporary American Indian literature Developing a dynamic dialogic and reciprocal relationship between their native worldviews and literary techniques on the one hand and those of the larger society on the other the writers examined in this study Anna Lee Walters Diane Glancy James Welch Linda Hogan Thomas King and Gerald Vizenor stress the processual nature of culture These writers demonstrate that transculturation functions as a major strategy of survival for Native Americans in the past and in the

Kirk, 2007 For many it was more than a publication it was a way of life The Whole Earth Catalog billed itself as Access to Tools and it grew from a Bay Area blip to a national phenomenon catering to hippies do it yourselfers and anyone interested in self sufficiency independent of mainstream America now known as living off the grid In recovering the history of the Catalog's unique brand of environmentalism historian Kirk recounts how Stewart Brand and the Point Foundation promoted a philosophy of pragmatic environmentalism that celebrated technological achievement human ingenuity and sustainable living Kirk shows us that Whole Earth was more than a mere counterculture fad At a time when many of these ideas were seen as heretical to a predominantly wilderness based movement it became a critical forum for environmental alternatives and a model for how complicated ecological ideas could be presented in a hopeful and even humorous way From publisher description *Anthropology and the Will to Meaning* Vassos Argyrou, 2002-05-20 Anthropology the study of societies and cultures different to our own is based on the humanist assumption that difference does not mean otherness and inferiority In this book Vassos Argyrou puts forward a powerful critique of both modern and postmodern anthropology that reveals the self centered logic of anthropological humanism offering the controversial conclusion that the anthropological project is forever doomed to failure At the heart of the book is the idea that anthropologists are driven to produce knowledge not by a desire for power as it is often assumed but a by desire for meaning Interpretation of Other societies and cultures allows them to construct an image of a symbolically unified ethically ordered and hence meaningful world Vassos Argyrou shows this assumption to be untenable because differentiation and distinction are in the nature of human being He further argues that paradoxically by trying to uphold Sameness anthropologists reproduce inadvertently but inevitably its contrary **The Nature Study Movement** Kevin C. Armitage, 2009 The first comprehensive history of the nature study movement and its significance to American environmental thought and politics Argues that nature study advocates through their systematic program or educating children about nature formed a critical foundation for the launching of the conservation movement *Transposing Cultures* Tara C. Browner, 1995 *Indian-made* Erika Marie Bsumek, 2008 In works of silver and wool the Navajos have established a unique brand of American craft And when their artisans were integrated into the American economy during the late nineteenth century they became part of a complex cultural and economic framework in which their handmade crafts conveyed meanings beyond simple adornment

Bsumek unravels the layers of meaning that surround the branding of Indian made goods. When Navajo artisans produced their goods, collaborating traders, tourist industry personnel, and even ethnologists created a vision of Navajo culture that had little to do with Navajos themselves. And as Anglos consumed Navajo crafts, they also consumed the romantic notion of Navajos as primitives perpetuated by the marketplace. These processes of production and consumption reinforced each other, creating a symbiotic relationship and influencing both mutual Anglo Navajo perceptions and the ways in which Navajos participated in the modern marketplace. Ultimately, Bsumek shows that the sale of Indian made goods cannot be explained solely through supply and demand. It must also reckon with the multiple images and narratives that grew up around the goods themselves, integrating consumer culture, tourism, and history to open new perspectives on our understanding of American Indian material culture.
