Computer Systems that Learn Sholom M. Weiss,Casimir A. Assessing and Improving Prediction and Classification Timothy Masters,2013-04-21 This book begins by presenting methods for performing practical real life assessment of the performance of prediction and classification models It then goes on to discuss techniques for improving the performance of such models by intelligent resampling of training testing data combining multiple models into sophisticated committees and making use of exogenous information to dynamically choose modeling methodologies Rigorous statistical techniques for computing confidence in predictions and decisions receive extensive treatment Finally a hundred pages are devoted to the use of information theory in evaluating and selecting useful predictors Special attention is paid to Schreiber s Information Transfer a recent generalization of Grainger Causality Well commented C code is given for every algorithm and technique The ultimate purpose of this text is three fold The first goal is to open the eyes of serious developers to some of the hidden pitfalls that lurk in the model development process The second is to provide broad exposure for some of the most powerful model enhancement algorithms that have emerged from academia in the last two decades while not bogging down readers in cryptic mathematical theory Finally this text should provide the reader with a toolbox of ready to use C code that can be easily incorporated into his or her existing programs

Quantitative Geosciences: Data Analytics, Geostatistics, Reservoir Characterization and Modeling Y. Z. Ma,2019-07-15 Earth science is becoming increasingly quantitative in the digital age Quantification of geoscience and engineering problems underpins many of the applications of big data and artificial intelligence This book presents quantitative geosciences in three parts Part 1 presents data analytics using probability statistical and machine learning methods Part 2 covers reservoir characterization using several geoscience disciplines including geology geophysics petrophysics and geostatistics Part 3 treats reservoir modeling resource evaluation and uncertainty analysis using integrated geoscience engineering and geostatistical methods As the petroleum industry is heading towards operating oil fields digitally a multidisciplinary skillset is a must for geoscientists who need to use data analytics to resolve inconsistencies in various sources of data model reservoir properties evaluate uncertainties and quantify risk for decision making This book intends to serve as a bridge for advancing the multidisciplinary integration for digital fields The goal is to move beyond using quantitative methods individually to an integrated descriptive quantitative analysis In big data everything tells us something but nothing tells us everything This book emphasizes the integrated multidisciplinary solutions for practical problems in resource evaluation and field
