Phenylketonuria PKU is the leading biochemical cause for mental retardation in children. The study suggests levels of tyrosine reaching the brain are directly relational to the cognitive functions in the prefrontal cortex. *Cognitive and Behavioral Abnormalities of Pediatric Diseases* Ruth D. Nass, Yitzchak Frank, 2010. This book provides a detailed account of intellectual, other neuropsychological, and behavioral manifestations of general pediatric diseases. The conditions discussed include the whole range of pediatric diseases, genetic syndromes, other congenital conditions, metabolic, endocrine, gastrointestinal, infectious, immunologic, toxic, trauma, and neoplastic, as well as sensory disabilities including deafness and blindness. Although the book is not intended to discuss cognitive and behavioral manifestations of conditions usually considered to be primary neurological disease, some of those including cerebral palsy, muscular dystrophy, myotonic dystrophy, and epilepsy are included. Where possible, a translational approach is used, linking the behavioral and cognitive manifestations of these conditions to the underlying structural, chemical, or genetic abnormalities and their effect on the brain and in turn on behavior and cognition. At the same time, included are significant psychosocial factors. Together, those factors have a major effect on patients' performance, including school performance and on their families. This book is unique in its extensive coverage of the major pediatric conditions and of the detailed neurological, neuropsychological, and behavioral aspects of each condition.

Exekutive Funktionen und Selbstregulation Sabine Kubesch, 2016-08-08. Exekutive Funktionen sind jene Fähigkeiten des Menschen, die das eigene Denken und Handeln steuern, aber auch die eigenen Emotionen regulieren. Bei Kindern sind die exekutiven Funktionen noch nicht voll ausgeprägt, allerdings beeinflussen sie bereits entscheidend die Lernleistungen und die sozial-emotionale Entwicklung. Viele Befunde aus den Bereichen der Psychologie, Kognitiven Neurowissenschaften und Pädagogik sprechen dafür, dass den exekutiven Funktionen eine Schlüsselrolle sowohl hinsichtlich des Lern- und Schulerfolges als auch in Bezug auf Verhaltensauffälligkeiten und Störungen wie ADHS zukommt. Im vorliegenden Band werden erstmals die zentralen Texte aus Europa und den USA vorgelegt und in den hiesigen Bezugsrahmen eingeordnet. Zudem wird in diesem State of the Art Werk dargestellt, wie der konkrete Transfer in die pädagogische und schulische Praxis vollzogen werden kann. Die zweite, erweiterte Auflage zeichnet sich durch weit über 150 Praxisbeispiele zum Training exekutiver Funktionen zum Erwerb von Willensstärke und Selbstkontrolle und zur Ausbildung der Selbstregulationsfähigkeit in der Familie aus. Mit Beiträgen von Roy F. Baumeister, Monika Brunsting, Adele Diamond, Armin Emrich, Torkel Klingberg, Walter Mischel, Daniel Siegel, Manfred Spitzer, Philip David Zelazo und vielen anderen mehr.

research *Brain Development and Cognition* Mark H. Johnson, Yuko Munakata, Rick O. Gilmore, 2008-04-15 The first edition of this successful reader brought together key readings in the area of developmental cognitive neuroscience for students. Now updated in order to keep up with this fast moving field the volume includes new readings illustrating recent developments along with updated versions of previous contributions **Short-and Long-term Memory in Infancy and Early Childhood** Lisa M. Oakes, Patricia J. Bauer, 2007 Despite early speculations that young infants are unable to form memories since the 1950s developmental scientists have documented amazing memory abilities in infancy and explored how these abilities develop. This research on memory development in infancy and early childhood has recently moved in exciting new directions. Extensions of work on memory systems in adults and the use of behavioral and neuroscience methods to study early developing memory abilities have led to an explosion of ideas about the neural underpinnings of memory its development and the mechanisms involved in these developmental changes. This book focuses on recent empirical and theoretical advances in the study of memory development in infancy and early childhood and on mechanisms of developmental change. Its chapters allow readers to compare and contrast contemporary views of memory development and gain an understanding of what we do and do not yet know about how memory develops in early childhood.

Individual Differences and the Development of Perceived Control Ellen A. Skinner, Melanie J. Zimmer-Gembeck, James P.
