*Salt in Prehistoric Europe* Anthony Harding, 2013-11-01 Salt was a commodity of great importance in the ancient past just as it is today Its roles in promoting human health and in making food more palatable are well known in peasant societies it also plays a very important role in the preservation of foodstuffs and in a range of industries Uncovering the evidence for the ancient production and use of salt has been a concern for historians over many years but interest in the archaeology of salt has been a particular focus of research in recent times This book charts the history of research on archaeological salt and traces the story of its production in Europe from earliest times down to the Iron Age It presents the results of recent research which has shown how much new evidence is now available from the different countries of Europe The book considers new approaches to the archaeology of salt including a GIS analysis of the oft cited association between Bronze Age hoards and salt sources and investigates the possibility of a new narrative of salt production in prehistoric Europe based on the role of salt in society including issues of gender and the control of sources The book is intended for both academics and the general reader interested in the prehistory of a fundamental but often under appreciated commodity in the ancient past It includes the results of the author's own research as well as an up to date survey of current work

**The Handbook of Religions in Ancient Europe** Lisbeth Bredholt Christensen, Olav Hammer, David Warburton, 2014-09-11 The Handbook of Religions in Ancient Europe surveys the major religious currents of Europe before Christianity the first continental religion with hegemonic ambition wiped out most local religions The evidence whether archaeological or written is notoriously difficult to interpret and the variety of religions documented by the sources and the range of languages used are bewildering The Handbook brings together leading authorities on pre Christian religious history to provide a state of the art survey The first section of the book covers the Prehistoric period from the Paleolithic to the Bronze Age The second section covers the period since writing systems began Ranging across the Mediterranean and Northern Celtic and Slavic Europe the essays assess the archaeological and textual evidence Dispersed archaeological remains and biased outside sources constitute our main sources of information so the complex task of interpreting these traces is explained for each case The Handbook also aims to highlight the plurality of religion in ancient Europe the many ways in which it is expressed notably in discourse action organization and material culture how it is produced and maintained by different people with different interests how communities always connect with or disassociate from adjunct communities and how their beliefs and rituals are shaped by
