Prehistoric Sites In The Isle Of Man:

The Chambered Tombs of the Isle of Man Audrey Henshall, 2017-11-17 This is the first book ever devoted to the chambered tombs of the Isle of Man and though there are no more than nine surviving monuments they are of considerable interest and importance because of the central location of the island in the north Irish Sea where cultural influences and traditions of tomb building are mixed *Prehistoric Sites in the Isle of Man* A. M. Cubbon, 2005 **The Neolithic Culture of the Isle of Man** Stephen Burrow, Rajka Makjanić, 1997 This study's main aim is to summarise the available site and ceramic evidence upon which understanding of the Manx Neolithic currently rests augmented with discussion of the location and topography of the island and the history of Manx research studies **Recent Archaeological Research on the Isle of Man** Peter J. Davey, S. D. White, Peter Davey, 1999 Includes the papers delivered at a seminar held in the Manx Museum 1998 The Neolithic of the Irish Sea Chris Fowler, 2015-03-31 This collection of 24 papers aims to reconsider the nature and significance of the Irish Sea as an area of cultural interaction during the Neolithic period The traditional character of work across this region has emphasised the existence of prehistoric contact with sea routes criss crossing between Ireland the Isle of Man Anglesey and the British mainland A parallel course of investigation however has demonstrated that the British and Irish Neolithics were in many ways different with distinct indigenous patterns of activity and social practices The recent emphasis on regional studies has further produced evidence for parallel yet different processes of cultural change taking place throughout the British Isles as a whole This volume brings together some of these regional perspectives and compares them across the Irish Sea area The authors consider new ways to explain regional patterning in the use of material objects and relate them to past practices and social strategies Were there practices that were shared across the Irish Sea area linking different styles of monuments and material culture or were the media intrinsic to the message The volume is based on papers presented at a conference held at the University of Manchester in 2002 *Folklore of Prehistoric Sites in Britain* Leslie V. Grinsell, 1976 *The Chambered Tombs of the Isle of Man* Audrey S. Henshall, 2017 This is the first book ever devoted to the chambered tombs of the Isle of Man and though there are no more than nine surviving monuments they are of considerable interest and importance because of the central location of the island in the north Irish Sea where cultural influences and traditions of tomb building are mixed and no doubt populations too These monuments still impressive reminders of the past in our contemporary landscape belong to the early 4th millennium BC when farming one of the most significant movers of change in society first came to the Isle of Man These vast stone chambers speak of the power of ancestors the continuity of family groups and the importance of the land and territory which sustained them Work on this book was begun in the 1960s by Audrey Henshall the foremost authority on these monuments in Britain It has been edited and brought up to date for publication by Frances Lynch and Peter Davey and contains a comprehensive study of previous work on the tombs new plans and commentary on each site and also a review of the associated finds from excavation
